

2018 HARLEY-DAVIDSON®
GENUINE MOTOR
PARTS + ACCESSORIES

ALL FOR FREEDOM. FREEDOM FOR ALL.™

It's not just a machine — it's the freedom to express exactly who you are. Whether it's head-to-tail chrome or blacked out and sinister, there's nothing like having your Harley-Davidson® motorcycle exactly the way you want it.

Every nuance of your ride — from how you feel in the saddle to how it looks parked under a streetlight in front of your favorite hangout — is for you and you alone to decide. And it all starts right here. From the company that practically invented freedom come thousands of parts and accessories, each designed to accomplish one simple task: to make your Harley-Davidson® motorcycle yours.

YOU BOUGHT A HARLEY-DAVIDSON.[®] NOW GET THE PARTS THAT KEEP IT A HARLEY.[®]

You didn't settle when you chose the bike. So why go for second best when it's time for parts? To create a truly unique declaration of your own personality and attitude, you need the parts to perform up to Harley-Davidson standards: exceptional styling, durability and finish. We engineer our parts to your bike's Original Equipment specifications and torture them in the lab and on the test track to ensure fit, function and durability. All this, along with corrosion and vibration testing, gives you the satisfaction and security you need to take on all of life's adventures. And we back it up with a two-year warranty on accessories installed within 60 days of vehicle purchase. After all, the Harley-Davidson reputation rides on the quality of our parts.

THE TANK SAYS "HARLEY-DAVIDSON." EVERYTHING ELSE SAYS YOU.

No two riders' bikes are the same. That's why Harley-Davidson offers thousands of parts and accessories to let you make your bike as one of a kind as you are.

COMFORT

The better your bike fits, the more time you'll want to spend chasing that yellow line. When you personalize the bike with a seat, a handlebar, foot controls and ride height that's just right, you and your passenger will be comfortable mile after mile.

FUNCTION

For a quick commute or a trip across the country, a windshield, a luggage rack, a passenger backrest and saddlebags all help you get the most out of your ride.

STYLE

Don't just make a statement — ride one. Chrome or black. Traditional or contemporary. New school or old school. Pick your direction and Harley-Davidson can deliver the options that make it yours.

PERFORMANCE

With Screamin' Eagle® Performance Parts, you can take the performance of your bike to the next level. From intake and exhaust to big bore kits and premium suspension, Harley-Davidson delivers the adrenaline rush you crave.

TRUE TO FORM

On the road, you’ve got to feel good in the saddle. When you swing your leg over and your foot taps the ground on the other side, the bike welcomes you like an old friend. When your hands and feet fall naturally to the controls, you feel in command. Whether you’re cruising around town or out for a long run, your bike should feel like an extension of yourself.

THE SWEET SIGH OF RELIEF

The correct riding position can help a rider sit comfortably on the bike and avoid leg cramps and back strain during a long day in the saddle. Selecting the proper seat height, handlebar and foot controls will put you on the road to a nearly effortless riding experience.

FOR THE TALLER RIDER

A SELECTING THE RIGHT SEAT

For riders with longer inseams, consider testing a Tallboy® seat. It's designed to move the rider up and back from the stock seating position to avoid a “knees-high” leg position.

B COMFORT WITHIN REACH

The position of your hands, wrists and elbows directly affects how you feel on the bike. A Tallboy® handlebar moves the controls away from the rider for a natural arm stretch.

C STRETCH FOR THE LONG HAUL

Extended-reach footboards, a folding heel shift lever, and a Mustache Engine Guard or highway pegs provide freedom to stretch and change position while riding.

RIDING POSITIONS

PROFILING

High-style, boulevard-bound posture that’s achieved with a pulled-back or an ape hanger type handlebar, forward foot position, and solo or low profile seat.

CRUISING

The ultimate fusion of comfort and laid-back style that’s achieved with a tall pulled-back handlebar, a deep seat and a mid-range foot position.

SPORT

Upright stance with emphasis on handling that’s achieved with flat handlebars and a mid-range or slightly mid-range foot position.

TOURING

Natural, upright position for high-mile comfort that’s achieved with a wide handlebar, a standard foot position with pegs or footboards, and a deep bucket seat.

TAKE CONTROL

Control on the road is paramount for the rider. Sitting comfortably, grasping the handlebar firmly and placing your feet on the ground with confidence all result in a controlled and comfortable ride.

FOR THE SHORTER RIDER

A COMFORT UP FOR GRABS

Selecting the right handlebar is critical for a rider with short arms. The width, rise and pullback of the handlebars should allow the hands to lie naturally on the bars without pulling the rider forward on the seat when turning.

B POSITION OF POWER

Designed to move riders with a shorter inseam closer to the controls, the Reach® Seat also features a lower profile and a narrow thigh zone to bring the legs closer together to minimize leg stretch.

C LOWERING THE SUSPENSION

Adjusting the ride height by lowering the suspension generates a lower center of gravity, increasing control for the shorter rider. Combined with a narrow-width seat, the feet remain firmly planted at a stop.

CHOOSE YOUR TOOLS

Cruising, chasing the horizon or a little of both? Harley-Davidson has a wide range of saddlebags, luggage racks, Tour-Pak® carriers, backrests and other functional items that will come in handy out on the open road. Consider your riding style when choosing functional accessories, and if it's versatility you crave, check out some of the detachable accessories below.

EQUIPPED FOR THE ROAD

Geared up with the right accessories, this long-haul motorcycle is ready to tackle the miles. Comfort-driven accessories, such as windshields and backrests, ease the physical strain of life on the road and make for a less stressful ride. Visit your Harley-Davidson® dealer for more details on finding your perfect fit.

A WINDSHIELDS

Nobody likes getting abused by a head wind. Adding a detachable windshield will take the wind off your chest and arms and keep you out on the road longer.

B PASSENGER BACKRESTS

With a detachable backrest, your bike can go from a stripped-down afternoon cruiser to a two-up touring machine in seconds. Your passenger will thank you.

LOAD UP

Depending on the ride you've got planned, your storage needs will vary. Efficient, versatile luggage systems provide you with the storage space for a longer ride. Pack your rainsuit, riding gear, tools, tent and sleeping bag. You'll still have room for the T-shirts you buy along the way.

C SADDLEBAGS

Saddlebags provide ample storage and carry the weight low on the bike for a comfortable riding balance. Detachable leather bags allow you to strip the bike down when you arrive.

E LUGGAGE RACKS AND SOFT LUGGAGE

Designed for maximum versatility, soft touring bags accommodate a lot of gear. The bags easily strap to a luggage rack and offer grab-and-go convenience once you've reached your destination.

STRIPPED FOR THE STREET

Designed to be installed or removed in seconds, detachable accessories give you the flexibility to outfit your bike for the day's ride. Pop off the windshield, backrest and saddlebags and you're ready for a night on the town.

PUT YOUR SIGNATURE ON OURS

This is where your motorcycle comes to life. Machinery can only take you so far — it's up to your unrelenting passion to make the bike into a symbol of your individuality. Style isn't dictated by the masses — it's something that comes from your soul. Old school, new school or no school — find a direction, take a stance and execute accordingly.

Exact same bike, entirely different style. Whether you're looking for a stripped-down, dark-as-night look or a complete chrome makeover, these unique takes on the 2018 Breakout® model will give you exactly what you need and nothing you don't.

DARK AS NIGHT

Strip it down and black it out. This twisted take on custom keeps the minimalist roots of motorcycling alive.

Black hand controls and fork sliders set the tone up front, while the flat drag-style handlebar, gloss-black engine covers and black ceramic-coated Screamin' Eagle® mufflers bring a little unrest to the streets.

BRIGHT AS DAY

When it's layered in chrome and custom paint, double-takes come with the territory and gawking crowds get old...almost.

Start at the beginning with chrome front forks and a high-rise ape handlebar. Then draw the eye to the rear with custom foot controls, engine covers and Screamin' Eagle® exhaust. Chrome is classic for a reason.

SCREAMIN' EAGLE® PERFORMANCE

Start quick. Turn tight. Stop fast. Repeat. Screamin' Eagle® Performance Parts and Accessories are engineered with absolute precision and designed to amp up the performance of your powertrain, suspension and exhaust. We make these upgrades work together to boost output without compromising reliability or rideability. It's our goal to make sure riders get everything needed to turn a stock bike into a heart-pounding, pavement-melting, one-of-a-kind freedom machine.

MORE POWER

Your V-Twin engine has so much more to give. You just have to know where to find it. From a little more torque (when compared to stock bikes) to gobs of hang-on-tight horsepower, Screamin' Eagle® Performance Parts and Accessories can help you get everything you ever wanted out of your Harley-Davidson® powerplant. Available as single parts or all-in-one stage kits, Screamin' Eagle® components are ready to take the performance of your engine to new heights.

PURE SOUND

The sound of a Harley-Davidson® motorcycle grabs the heart and moves the soul. The complete line of Screamin' Eagle® Performance Mufflers are tuned to enhance the bass notes and deliver a rich melodic tone from idle to wide-open throttle. When compared to stock bikes, these stylish slip-on mufflers produce real-world performance improvement, while maintaining compliant sound levels.

GREAT RIDE

Whether you're fine-tuning for cargo and passengers or looking to carry more speed through the twisties, an upgraded Screamin' Eagle® suspension allows you to get maximum comfort and handling out of your ride.

All Screamin' Eagle® products listed in this catalog are 50-state U.S. EPA compliant (street legal) for sale and use on all applicable vehicles. Screamin' Eagle® products are not available for sale and are not street legal in all countries. Please consult your dealer for more information. Windshields & LED Headlamps

A. QUICK-RELEASE SUPER SPORT WINDSHIELD

Reduces the pounding of wind and shower of bugs but keeps the wind-in-the-hair feeling. Ideal for a cool morning ride, the sleek profile of the Super Sport Windshield hugs the front headlamp for a sporty look. The windshield mounts to the fork tubes with elegant die-cast lever locking clamps, so the windshield does not require any "leave-behind" docking hardware. You get quick on-and-off convenience and a clean, custom look. No tools are required and the kit includes everything needed to install the windshield.

57400192 Light Smoke. **\$319.95**
Fits '15-later XG models (except XG750A). Installation requires removal of Original Equipment headlamp visor. Models equipped with a front mounted license plate require separate purchase of License Plate Bracket P/N 67900227. Windshield dimensions: Overall height 25.0"; width – 20.1".

B. DAYMAKER™ LED HEADLAMPS

Cut through the night. Harley-Davidson® LED Lamps are brighter and whiter in color and provide a superior light pattern over standard incandescent lamps. Compared to the yellow light of a traditional halogen bulb, the LED lamp produces a "Daylight Color Impression" that appears more natural to the user. Headlamps feature horizontal "D-shaped" lenses that focus light into a pool in front of the motorcycle and separate high beam and low beam projector lenses that provide a focused beam of light ahead. Lamps are available in your choice of brilliant chrome or gloss black background to match your styling direction. The solid-state LEDs are designed for long life and the shock- and vibration-resistant lamp assembly mounts into existing light housings. Installation is quick and easy and the plug-in lamps connect to the factory headlamp wiring. The LED lamps are DOT and ECE compliant.

Fits '15-later XG models.

**C. CAFÉ SOLO SEAT****C. CAFÉ SOLO SEAT**

There's something about the placement of the rider that makes the Café Solo Seat special. The one-up design and the high back pad hold the rider in place and provide a direct connection to the bike. You sit "in" the bike and your hands and feet reach naturally to the controls. The low-slung pad, narrow nose and the tapered tail enhance the bike's sporting profile and pays homage to the heritage of the iconic Café Racer style.

52000168 **\$219.95**
Fits '15-later XG models (except XG750A). Seat width 11.25".

D. REACH® SEAT

Designed specifically for riders requiring a close to the bar riding position, this Reach® Seat is shaped to place the rider in a comfortable and confident relationship to the hand and foot controls. The seat moves the rider approximately 1.5" lower and 1.25" forward and the 1.25" slimmer front profile brings the legs closer together for an easier reach to the ground at a stop. The Reach Seat features a stepped profile that keeps the rider from sliding back during acceleration.

52000123 **\$199.95**
Fits '15-later XG models (except XG750A). Seat width 10.25"; passenger pillion width 6.75".

E. TALLBOY® SEAT

The correct riding position can help a tall rider sit comfortably on the bike, and avoid leg cramps and back strain during a long day in the saddle. For riders with a longer inseam, a Tallboy® Seat will put you on the road to fatigue-free riding. Designed to move the rider 1.25" up and 2.5" back from the stock seating position, a Tallboy Seat can eliminate the "knees-high" riding position and effectively places the body for a natural arm and leg reach to the controls.

52000124 **\$199.95**
Fits '15-later XG models (except XG750A). Seat width 10.5"; passenger pillion width 7.5".

COMFORT IS KEY

Bikes are a personal thing. Your bike should fit you, not the other way around. So when you throw a leg over it and pull away from the curb, you should be feeling there isn't another bike in the world you'd rather be sitting on. That's how a motorcycle equipped with the right gear can make your time on the road as rewarding as possible.

EQUIPPED FOR THE LONG HAUL

Depending on the trip, your riding equipment may have to change at a moment's notice. That's why Harley-Davidson offers an entire array of quick-detach road accessories. From windshields and saddlebags to seats and backrests, your ride can flex between a stripped-down street machine and a fully loaded touring beast in seconds.

CHANGE YOUR ENVIRONMENT

A comfortable seat, hand and foot position triangle is essential if you are looking to pile up the miles. But it's not the only thing. Protection from the wind, temperature management, suspension settings and back support all factor into how far you can ride.

A DETACHABLE WINDSHIELD

By diverting air pressure away from your chest, a windshield can add hours of riding comfort. For quick on-and-off convenience, snap on a Quick-Release windshield.

B DETACHABLE SEAT

Seats are available to fit a variety of riders and riding styles. From a low-profile street look to cross-country comfort, quick-detach Seat Hardware lets you change at a moment's notice.

C DETACHABLE BACKREST

A Detachable Sissy Bar Upright and Passenger Backrest add support and comfort and provide your passenger a sense of security without grabbing the rider around the waist.

CAFÉ CUSTOM

A Café bike starts with a “less-is-more” philosophy. Low-slung bars, rear-set foot controls and a narrow profile define the style. And when stripped of all “unnecessary” accessories, these unburdened motorcycles are lighter, faster and have a harder-edged, rebellious look that reflects the rider’s bare-knuckle attitude.

This Iron 883™ model is caffeine fueled, fully wired, and ready to carve up back roads. Equipped with a suite of Café Custom components and a Screamin' Eagle® fully adjustable suspension, this aggressive riding profile puts you firmly in control.

1 CLIP-ON BARS

Low, narrow clip-on handlebars enable the rider to “tuck in,” helping to reduce wind resistance and improve control.

2 BAR END MIRRORS

Bar End Mirrors provide a clean, streamlined look, and the outside-the-grip location eases the view past your hands and shoulders.

3 REAR SET CONTROLS

For the ultimate in aggressive riding posture, Rear Set Foot Controls reposition your feet to encourage a tank-hugging profile.

4 CAFÉ TAIL SECTION

This fast-back solo seat provides the perfect lay-down aggressive riding posture for splitting lanes or carving corners.

A. CAFÉ CUSTOM TAIL SECTION

Create your own link to the Sportster®-based racing and performance bikes of the '60s and '70s. This fast-back solo seat and tail section mirrors the look and feel of the iconic 1977-78 Harley-Davidson® XLCR Café Racer model, and re-imagines the style for the modern era. Ideal for use with Clip-On or Sportster Clubman Handlebars and mid- or rear-set foot controls, this seat provides the perfect lay-down aggressive riding posture for splitting lanes or carving corners. The seat's upturned tail and longer nose positions the solo rider closer to the tank for better weight balance, quicker steering and added front-end feedback. The Tail Section is a true bolt-on design that wraps the fender struts, so unlike other café bike kits, there is no cutting, welding or frame modifications required. Installation is reversible – you can easily return your bike to the stock look. The complete kit features a sweeping composite tail section with a steel inner support, a deep solo bucket seat with backstop pad, and all necessary installation hardware.

Fits '10-later XL883N, XL1200CX, XL1200N, XL1200V and XL1200X models. Separate purchase of License Plate Bracket Kit P/N 67900360 for Canada models or P/N 67900359 for HDI models is required.

Mounted on the fork tubes below the upper triple tree, these Clip-On Handlebars place the rider in a low and aggressive tank-hugging riding posture. Ideal for carving corners and splitting lanes, these Clip-On bars narrow the overall width of the bike and keep the rider tightly tucked into the machine for a "one-with-the-bike" feeling. Fully adjustable for reach and height, these individual 12.25" bars are engineered from solid aluminum for strength, and drilled and dimpled to accept bar-end mirrors and standard hand controls. The beefy gloss black bars are secured to the fork tubes with precision-machined clamps and aircraft grade hardware. Kit includes bars, fork clamps and all mounting hardware. Individual vehicle applications may require separate purchase of instrument mount and cables or brake lines.

ENJOY THE RIDE

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

SPORTSTER® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

REACH®

Designed to place the rider in the best relationship to the controls, Reach® seats position short riders for a comfortable extension of the arms and legs.

LOW-PROFILE

These saddles combine radical styling with a “deep-in-the-bike” riding position. Long and lean, Badlander® seats bring you lower to the ground than most other seats.

TALLBOY®

The Tallboy® Solo Seat allows additional leg and arm movement for the long-limbed rider and the long seating space permits fore and aft repositioning while on the open road.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

TOURING SEATS

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape that holds you in place and provides additional back support.

92 SPORTSTER®

Seating – Reach® & Tallboy®

A. SUPER REACH® SOLO SEAT

Get a little bit closer. Super Reach® forward position seats are designed to move riders with a shorter inseam even closer to the controls and to bring the legs closer together so that your feet rest firmly on the pavement. After hundreds of hours of on-road and ergonomic testing, the seat shape and foam density were selected as the ideal position for riders 5'-0" to 5'-4" tall. The Super Reach Seat moves the rider 1.5" closer to the controls compared to stock seat on XL883L model, and 2" closer and .5" lower compared to stock seat on XL1200C model. The nose is 1.0" narrower than the stock seat, and it is tastefully sculpted to look great with any size Sportster® fuel tank. The combination of premium textured and smooth vinyl surfaces and charcoal gray stitching and embroidered Bar & Shield logo really set the seat apart. For the ultimate solo touring setup, add the Quick Release Rider Backrest P/N 52300245.

52000207

\$249.95

Fits '10-later XL models. Seat width 9.5".

B. REACH SEAT

Designed specifically for riders requiring a close to the bar riding position, without compromising comfort. This seat positions the rider approximately .5" forward, closer to the hand and foot controls. The narrow front profile brings your legs closer together to help you plant your feet firmly on the ground. The slightly bucketed rider seat offers lower back support and features a textured insert to prevent you from sliding around while riding.

Seating — Low Profile

A. BRAWLER® SOLO SEAT

When it's time to go it alone, go in style. These premium quality cowhide leather solo saddles feature a smooth, sleek design that hugs the frame rails for a true custom look. The Brawler® seat's design places the rider "in" the bike for a low-slung riding position, and features a kick-up in the rear to hold the rider in place. The seating position is generally lower than stock, but not as far back as Badlander or other low profile seats. The top-grain leather seating surface and contoured foam padding provide a firm but luxurious feel. Seat does not fit with passenger pillions.

52000269	\$299.95

B. CAFÉ SOLO SEAT

There's something about the placement of the rider that makes the Café Solo Seat special. The one-up design features a high back pad that holds the rider in place and provides a direct connection to the bike. You sit "in" the bike, and your hands and feet reach naturally to the controls. The low-slung black vinyl covered pad, the narrow nose and the tapered tail enhance the bike's sporting profile and pays homage to the heritage of the iconic Café Racer style.

52000260	\$349.95
Fits '10-later XL models. Does not fit with Rider Backrest P/N 52300245. Seat width 9.6".	

C. CAFÉ CUSTOM TAIL SECTION

Create your own link to the Sportster®-based racing and performance bikes of the '60s and '70s. This fast-back solo seat and tail section mirrors the look and feel of the iconic 1977-78 Harley-Davidson® XLCR Café Racer model, and re-imagines the style for the modern era. Ideal for use with Clip-On or Sportster Clubman Handlebars and mid- or rearset foot controls, this seat provides the perfect lay-down aggressive riding posture for splitting lanes or carving corners. The seat's upturned tail and longer nose positions the solo rider closer to the tank for better weight balance, quicker steering and added front-end feedback. The Tail Section is a true bolt-on design that wraps the fender struts, so unlike other café bike kits, there is no cutting, welding or frame modifications required. Installation is reversible – you can easily return your bike to the stock look. The complete kit features a sweeping composite tail section with a steel inner support, a deep solo bucket seat with backstop pad, and all necessary installation hardware.

PREMIUM ADJUSTABLE SUSPENSION

Your motorcycle's suspension defines the riding experience. Fast starts, smooth stops, and tight control in the corners are all part of the vehicle dynamics controlled by the tuning of the front forks and rear shocks. Screamin' Eagle® Fully Adjustable Suspension components let you dial-in the ride, whether you're cruising the highway, carving up a country road, or dodging city potholes.

1 COMPRESSION ADJUSTER

Fine tunes suspension to control the upward wheel movement when hitting a bump

Adjusts the speed at which the suspension compresses

Critical for balancing ride quality and suspension bottoming

2 REBOUND ADJUSTER

Fine tunes the downward wheel movement after riding over bumps or potholes

Adjusts the speed at which the suspension returns from extension

Critical for balancing ride quality and suspension bounce

3 PRELOAD ADJUSTER

Critical to setting the proper suspension travel to soak up large potholes and absorb large bumps

Adjusts for rider sag- the amount the suspension drops under the weight of the rider and cargo

4 PIGGYBACK RESERVOIR

Remote reservoir keeps the shock oil cooler to maintain damping performance

Internal bladder separates the oil from the nitrogen gas to reduce cavitation during aggressive riding

C. PERFORMANCE SUSPENSION KIT – XR1200

Maximize the canyon-carving ability of your XR1200 motorcycle with this complete Performance Suspension Kit. Fully-adjustable light-weight suspension system features Showa's new Big Piston Front fork (BPF) design. The BPF eliminates many of the internal components used in a cartridge-type fork, simplifying construction and resulting in lighter overall fork weight. The large-diameter of the BPF's internal piston allows a reduction in damping pressure, for better feedback and smoother action. This performance suspension kit also provides a very controlled feeling which leads to more rider confidence. The BPF's rebound and compression damping force settings are easily fine-tuned via two adjuster screws located on top of the fork bolts. The spring pre-load is adjusted via a M5 hex screw on the axle holders. The rear Showa® shocks feature 36mm pistons with piggyback nitrogen-charged reservoirs. The compression damping can be adjusted via a knob on top of the piggyback reservoir. The rebound is adjusted with a thumb wheel on the lower clevis. Rear spring pre-load is also adjustable on the shock for optimum 1G sag. The kit includes one set of Big Piston Front Forks and one set of rear shocks.

116 SPORTSTER®

Suspension

A. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT*

This Single Sided Cartridge Fork provides improved handling performance by keeping the tire in contact with the road surface. Tuned to work in concert with the Premium Emulsion Rear Shocks, the fork damping is controlled by a specifically calibrated piston and valve stack. Unlike typical orifice damping, the piston/valve system helps the cartridge fork achieve a linear damping force curve for consistent feel throughout the compression and extension of the front suspension. The cartridge allows the forks to react quickly to rough roads, inspiring rider confidence in sweeping corners. The compression piston provides excellent low speed damping for a better rider feel, and the rebound spring provides a smoother feel during topping. The cartridge fork resists bottoming and dive, and the triple rate spring and oil lock allows the forks to absorb bumps even under hard braking – giving the rider more control while resisting wheel hop. A perfect addition during the installation of chrome or gloss black lower fork sliders, the kit includes fork pipe, cartridge, fork bolts, main springs and oil seals.

B. PREMIUM RIDE EMULSION SHOCKS*

Experience a comfortable and confidence-inspiring ride – no matter the pavement conditions – with Harley-Davidson® Premium Ride Emulsion Shocks. These fast shocks offer enhanced compression and rebound damping control when compared to typical twin-tube shock absorbers. The nitrogen gas charged shocks resist oil aeration and work with the internal valve stack to provide superior damping control in the twisties. The large pistons and low viscosity high-performance oil allow these shocks to react quickly to impacts and keep the tires tracking the road surface. With the addition of urethane bumpers, you get a controlled ride and minimized bottoming harshness. The locking threaded adjustment lets you fine tune the spring preload to your current riding conditions – whether a solo run on the back roads or a fully-loaded two-up freeway tour. Kit includes left and right shock and preload adjustment spanner wrench.

FINDING THE RIGHT FIT

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control, and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

ESTABLISH YOUR POSITION

SUSPENSION

Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

Foot Controls

SPORTSTER® FOOT CONTROLS

A long stretch to the controls or a knees-high cramped riding position puts strain on your body after even a short ride. Repositioning your feet on the controls relieves muscle tension, takes pressure off the tail bone, and reduces rider fatigue. Where your feet contact the controls can often determine how many miles you can put on in a day.

Many Sportster® models can be equipped with the following foot control configurations:

MID-CONTROLS:

Original Equipment on some models, Mid-Controls position the feet below the knee for a sporting riding posture.

FURTHER FORWARD MID-CONTROLS:

Achieves a comfortable foot-down riding position for the taller rider.

REDUCED REACH FORWARD CONTROLS:

Provides a foot-forward boulevard style without straining to reach the controls.

STANDARD FORWARD CONTROLS:

Places the legs for a "feet-in the-wind" laid back profiling posture.

EXTENDED REACH FORWARD CONTROLS:

Accommodates the tallest rider by stretching the leg a full 3.5" further forward.

D. STANDARD FORWARD CONTROL KIT*

Add the stretched-out look and extended riding position to your Sportster model. The complete kit includes all hardware necessary to convert your Sportster model from mid-controls to forward controls. Available in your choice of finishes, these forward controls add style and long range comfort. (Footpegs and shifter peg not included.)

This comprehensive kit includes everything necessary for installation. The kit includes brake and shifter mounting brackets, brake lever, brake and shift linkage, replacement wear pegs, and all the required hardware. B. REDUCED REACH FORWARD CONTROL CONVERSION KIT*

This Forward Control Conversion Kit repositions the Original Equipment footpegs and foot controls up and back by 2.0" and positions the controls closer to the rider for added comfort and confidence. This kit provides additional leg clearance around the chassis and air cleaner by moving the footpegs outward 1.5" (left) and 0.5" (right). The reduced reach places the rider's boot at the proper pivot point for improved leverage, while maintaining the "foot-forward" riding profile. This easy-to-install Conversion Kit includes heavy-duty steel mounts and shortened brake rod and reuses Original Equipment control supports and brake and shift levers or can be personalized with your choice of custom lever styles.

The forward location provides an open path for your feet to aid maneuvering the bike while parking and improves access to the jiffy stand for a shorter rider. Kit includes control mounts, brake and shift levers, brake rod, mini-footboards with wear pegs and all hardware necessary to convert your mid- or forward-control equipped Sportster® model.

COMFORT IS KEY

Bikes are a personal thing. Your bike should fit you, not the other way around. So when you throw a leg over it and pull away from the curb, you should be feeling there isn't another bike in the world you'd rather be sitting on. That's how a motorcycle equipped with the right gear can make your time on the road as rewarding as possible.

EQUIPPED FOR THE LONG HAUL

Depending on the trip, your riding equipment may have to change at a moment's notice. That's why Harley-Davidson offers an entire array of quick-detach road accessories. From windshields and saddlebags to seats and backrests, your ride can flex between a stripped-down street machine and a fully loaded touring beast in seconds.

CHANGE YOUR ENVIRONMENT

A comfortable seat, hand and foot position triangle is essential if you are looking to pile up the miles. But it's not the only thing. Protection from the wind, temperature management, suspension settings and back support all factor into how far you can ride.

A DETACHABLE WINDSHIELD

By diverting air pressure away from your chest, a windshield can add hours of riding comfort. For quick on-and-off convenience, snap on a Quick-Release windshield.

B DETACHABLE SEAT

Seats are available to fit a variety of riders and riding styles. From a low-profile street look to cross-country comfort, quick-detach Seat Hardware lets you change at a moment's notice.

C DETACHABLE BACKREST

A Detachable Sissy Bar Upright and Passenger Backrest add support and comfort and provide your passenger a sense of security without grabbing the rider around the waist.

ENJOY THE RIDE

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

DYNA® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

REACH®

Designed to place the rider in the best relationship to the controls, Reach® seats position short riders for a comfortable extension of the arms and legs.

LOW-PROFILE

These saddles combine radical styling with a "deep-in-the-bike" riding position. Long and lean, Badlander® seats bring you lower to the ground than most other seats.

TALLBOY®

The Tallboy® Seat allows additional leg and arm movement for the long-limbed rider and the long seating space permits fore and aft repositioning while on the open road.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

TOURING SEATS

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape that holds you in place and provides additional back support.

A. SUPER REACH SOLO SEAT

A. SUPER REACH® SOLO SEAT

Get a little bit closer. Super Reach® forward position seats are designed to move riders with a shorter inseam even closer to the controls and to bring the legs about 1.0" closer together so that your feet rest firmly on the pavement. The scooped bucket-shaped saddle is enhanced with added back support padding to move the rider up to 1.0" lower and 3.0" forward. The combination positions the rider closer to the hand and foot controls to offer both comfort and confidence. For a two-up ride, combine the solo seat with the Touring Passenger Pillion P/N 51404-10 (sold separately).

54384-11 **\$239.95**
Fits '06-'17 Dyna® models. Seat width 10.5".

B. REACH SEAT

The seat features a textured vinyl insert and a Harley-Davidson logo that shows you are riding in style.

52288-06 **\$309.95**

The Tallboy Seat also features a wide pillion for added passenger comfort.

This air bladder system is designed to reduce pressure points, provide shock absorption, and reduce vibration. Unlike other mouth-inflated seat pads, the Road Zeppelin Pad features an easy-to-reach integrated hand pump and metered air release valve that permits quick and controllable adjustment. FINDING THE RIGHT FIT

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control, and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

ESTABLISH YOUR POSITION

SUSPENSION

Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

A. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT

A. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT*

This Single Sided Cartridge Fork provides improved handling performance by keeping the tire in contact with the road surface. Tuned to work in concert with the Premium Emulsion Rear Shocks, the fork damping is controlled by a specifically calibrated piston and valve stack. Unlike typical orifice damping, the piston/valve system helps the cartridge fork achieve a linear damping force curve for consistent feel throughout the compression and extension of the front suspension. The cartridge allows the forks to react quickly to rough roads, inspiring rider confidence in sweeping corners. The compression piston provides excellent low speed damping for a better rider feel, and the rebound spring provides a smoother feel during topping. The cartridge fork resists bottoming and dive, and the triple rate spring and oil lock allows the forks to absorb bumps even under hard braking – giving the rider more control while resisting wheel hop. A perfect addition during the installation of chrome or gloss black lower fork sliders, the kit includes fork pipe, cartridge, fork bolts, main springs and oil seals.

54500058 \$349.95

Fits '06-'17 Dyna® models (except FLD, FXDWG and '07-'08 FXDSE). Original Equipment on FXDLS models.

B. PREMIUM RIDE EMULSION SHOCKS*

Experience a comfortable and confidence-inspiring ride – no matter the pavement conditions – with Harley-Davidson® Premium Ride Emulsion Shocks. These fast acting mono-tube nitrogen gas-charged shocks offer enhanced compression and rebound damping control when compared to typical twin-tube shock absorbers. The nitrogen gas charged shocks resist oil aeration and work with the internal valve stack to provide superior damping control in the twisties. The large 36mm pistons and low viscosity high-performance oil allow these shocks to react quickly to impacts and keep the tires tracking the road surface. You get a controlled ride and minimized bottoming harshness transmitted through the frame. The locking threaded adjustment lets you fine tune the spring preload to your current riding conditions – whether a solo run on the back roads or a fully-loaded two-up freeway tour – and urethane bumpers provide a softer feel if the shock bottoms under load. The beautifully-finished shocks feature black-anodized billet top caps and black progressively-wound springs. Kit includes left and right shock and preload adjustment spanner wrench.

54000066 Stock Height. \$599.95

Fits '06-'17 Dyna models (except FLD and '07-'08 FXDSE). Original Equipment on FXDLS models.

C. PREMIUM PROFILE® LOW REAR SUSPENSION KIT*

Introduced on the '08 FXDF model, these custom rear shocks lower your bike while they raise the level of style. These low-profile shocks lower the seat height by approximately 1.0". The rear shock and spring is completely covered with mirror-polished and chrome-plated sleeves for a sleek, beefy look.

Foot Controls

DYNA® FOOT CONTROL*

A long stretch to the controls or a knees-high cramped riding position puts strain on your body after even a short ride. Repositioning your feet on the controls relieves muscle tension, takes pressure off the tail bone, and reduces rider fatigue. Where your feet contact the controls can often determine how many miles you can put on in a day.

Dyna® models can be equipped with the following foot control configurations:

MID-CONTROLS:

Positions the feet below the knee for a sporting riding posture.

FURTHER FORWARD MID-CONTROLS:

Achieves a comfortable foot-down riding position for the taller rider.

REDUCED REACH FORWARD CONTROLS:

Provides a foot-forward boulevard style without straining to reach the controls.

STANDARD FORWARD CONTROLS:

Stretches the legs for a "feet-in-the-wind" laid back profiling posture.

FLOORBOARDS:

Supports the entire foot and places the rider in a comfortable upright position.

COMFORT IS KEY

Bikes are a personal thing. Your bike should fit you, not the other way around. So when you throw a leg over it and pull away from the curb, you should be feeling there isn't another bike in the world you'd rather be sitting on. That's how a motorcycle equipped with the right gear can make your time on the road as rewarding as possible.

EQUIPPED FOR THE LONG HAUL

Depending on the trip, your riding equipment may have to change at a moment's notice. That's why Harley-Davidson offers an entire array of quick-detach road accessories. From windshields and saddlebags to seats and backrests, your ride can flex between a stripped-down street machine and a fully loaded touring beast in seconds.

CHANGE YOUR ENVIRONMENT

A comfortable seat, hand and foot position triangle is essential if you are looking to pile up the miles. But it's not the only thing. Protection from the wind, temperature management, suspension settings and back support all factor into how far you can ride.

A DETACHABLE WINDSHIELD

By diverting air pressure away from your chest, a windshield can add hours of riding comfort. For quick on-and-off convenience, snap on a Quick-Release windshield.

B DETACHABLE SEAT

Seats are available to fit a variety of riders and riding styles. From a low-profile street look to cross-country comfort, quick-detach Seat Hardware lets you change at a moment's notice.

C DETACHABLE BACKREST

A Detachable Sissy Bar Upright and Passenger Backrest add support and comfort and provide your passenger a sense of security without grabbing the rider around the waist.

DEFY THE WIND

At highway speed, you take the wind full-force in the chest, causing fatigue in your arms, neck and shoulders. Take the pressure off with an easy-to-install detachable windshield. Shaped to divert air, rain and road debris around the rider, a windshield can add hours of riding comfort.

ENJOY THE RIDE

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

SOFTAIL® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

REACH®

Designed to place the rider in the best relationship to the controls, Reach® seats position short riders for a comfortable extension of the arms and legs.

TALLBOY®

The Tallboy® Seat allows additional leg and arm movement for the long-limbed rider and the long seating space permits fore and aft repositioning while on the open road.

TOURING

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape that holds you in place and provides additional back support.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

HAMMOCK SEATS

Designed to maximize long-range comfort, Hammock Seats feature a sling-like suspension system that prevents bottoming and shelters the rider from pothole and highway expansion joint impacts.

Recommended for riders between 5'-2" and 5'-8" tall, this Reach Handlebar is shaped to position the hand controls closer to the rider for optimized elbow and wrist position. Designed to provide the ideal balance of pull back and width, this handlebar allows your hands fall naturally in place. The narrower width reduces your stretch while making low-speed turns and parking lot maneuvers, and the overall effect is improved confidence and long-range comfort for short-armed riders.

Fits '18-later FLDE, FLHC, FLHCS, FLSL, FXBB and FXLR models. All models require separate purchase of additional installation components.

Slammed and styled for a low-profile look, this 1.25" handlebar places the hand controls closer to the rider for an optimized elbow bend and wrist position, offering improved confidence and long-range comfort for shorter-armed riders.

Fits '18-later FLDE, FLFB, FLFBS, FLHC, FLHCS, FLSL, FXBB, FXBR, FXBRS, FXFB, FXFBS and FXLR models. FLDE, FLHC, FLHCS, FLSL, FXBB and FXLR, and models require separate purchase of 1.25" handlebar riser kit. All models require separate purchase of additional installation components.

Recommended for riders 5'-9" and taller, this 1.0" Tallboy® handlebar enables long-armed riders to more comfortably fit and maneuver Softail® motorcycles. Shaped to provide the ideal balance of rise and width, this bar places the hands in a neutral position and stretches the arms to reduce the bend at the elbow.

Fits '18-later FLDE, FLHC, FLHCS, FLSL, FXBB and FXLR models. All models require separate purchase of additional installation components.

BRASS COLLECTION

The authentic alternative to the typical chrome-covered or blacked-out look, the Harley-Davidson® Brass Collection delivers a warm, hand-crafted look to your custom ride. These minimalistic living finish components make a garage-built styling statement and are the ideal addition to your stripped-down bobber or café motorcycle. Artistically manufactured from solid brass, these components feature a natural antique finish that will age and patina when exposed to the elements. Brass Collection components are factory treated with wax to slow the aging process, and are shipped with cleaning and care instructions.

Windshields – FL Softail® & Springer™

A. WIND SPLITTER VENTED WINDSHIELD

Reduce helmet buffeting at speed. The Harley-Davidson® Detachables™ Wind Splitter Vented Windshield features an exclusive fingertip-adjustable center vent that reduces turbulence behind the windscreen. When open, the controlled airflow fills the negative pressure area behind the shield and helps to smooth the flow of air over the top of the screen and around the rider. The revised flow reduces helmet bobbing and neck fatigue so you can comfortably spend more time in the saddle. The open vent also provides cooling airflow to the rider at low speeds and in city traffic.

Engineered to provide the riding comfort of a larger windshield, this low-profile screen's contemporary contour sets it apart from the crowd. The shape keeps the windshield below your sideline so you don't look through bugs and road grime and the detachable design means you can ride without the shield when the mood strikes. The shield is formed of hard-coated polycarbonate for strength and scratch resistance and the dark-smoked finish reduces glare. The slim polished stainless steel brackets mount to the Original Equipment rubber isolated docking points for ease of installation and removal.

ENJOY THE RIDE

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

SOFTAIL® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

LOW-PROFILE

These saddles combine radical styling with a “deep-in-the-bike” riding position. Long and lean, Badlander® seats bring you lower to the ground than most other seats.

REACH®

Designed to place the rider in the best relationship to the controls, Reach® seats position short riders for a comfortable extension of the arms and legs.

TALLBOY®

The Tallboy® Seat allows additional leg and arm movement for the long-limbed rider and the long seating space permits fore and aft repositioning while on the open road.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner’s manual for proper removal and installation of seats.

TOURING SEATS

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape that holds you in place and provides additional back support.

Seating – Low Profile

D. BRAWLER SOLO SEAT

D. BRAWLER® SOLO SEAT

When it's time to go it alone, go in style. These premium quality cowhide leather solo saddles feature a smooth, sleek design that hugs the frame rails for a true custom look. The Brawler® seat's design places the rider "in" the bike for a low-slung riding position, and features a "kick-up" in the rear to hold the rider in place. The seating position is generally lower than stock, but not as far back as Badlander or other low profile seats. The top-grain leather seating surface and contoured foam padding provide a firm but luxurious feel. Seat does not fit with passenger pillions.

52000267 \$349.95

Fits '07-'17 FLSTF, FLSTFB, FLSTFBS, FLSTSB, '06-'15 FXST, FXSTB, FXSTC, FXSTS and '07-'08 FXSTSSE models. Does not fit FLSTSE models. Seat width 12.5".

E. LEATHER BADLANDER® SEAT

The traditional Badlander® seat's low and lean style sets the stage for your minimalist custom ride. The frame-hugging rider seat and the slim tapered passenger pillion visually stretch the bike and enhance the slammed look. The seat shape stays low along its entire length and follows the lines of the bike with minimal disruption, and delivers a riding position that is lower and generally further back than the stock seat. Ideal for both short riders needing to be closer to the ground, or for tall riders that want to move back in the bike without sitting higher. This seat is wrapped in supple top-grain leather and finished with an embroidered Harley-Davidson script. Kit includes leather grab strap and mounting hardware.

52000254 \$379.95

Fits '07-'17 FLSTF, FLSTFB, FLSTFBS, FLSTSB, '06-'15 FXST, FXSTB, FXSTC, FXSTS and '07-'08 FXSTSSE models. Does not fit FLSTSE models. FLSTSB models require separate purchase of Passenger Footpeg Mounting Kit P/N 50932-08 and passenger footpegs. Seat width 12.0"; passenger pillion width 6.5".

F. BADLANDER SEAT

Clean smooth covers, subtle top-stitching and a frame-hugging profile add up to a statement only Harley could create. The low design delivers a reduced seat height that is ideal for riders that want the shortest possible reach to the ground, and the long and lean shape allows tall riders to move back from the hand and foot controls without sitting higher on the bike. Kit includes grab strap and all mounting hardware.

51397-06A \$279.95

The Bar & Shield logo is embossed into the leather surface as a finishing touch. Seating Accessories

A. ROAD ZEPPELIN® SEAT PAD

Experience ultimate comfort. Designed to ensure hours of comfort in the saddle, Road Zeppelin® Seat Pads are equipped with a unique air bladder system that allows your weight to be supported evenly across the entire seating surface. Whether you have a low profile seat or a larger more comfortable seat, you will feel the benefits. This air bladder system is designed to reduce pressure points, provide shock absorption, and reduce vibration. Unlike other mouth-inflated seat pads, the Road Zeppelin Pad features an easy-to-reach integrated hand pump and metered air release valve that permits quick and controllable adjustment. You can easily adjust the comfort and support while seated on the pad. The UV-stable and snag resistant mesh cover allows air to circulate beneath the rider's body, reducing the temperature trapped between the rider and seat. Shaped to conform to most Harley-Davidson® seats, the pads feature adjustable mounting straps and a non-skid surface to keep them in place. The hand-washable seat pad can be deflated and rolled for compact storage.

The low-profile design minimizes seat-height change compared to inflatable pads, while enhancing comfort with its shock-absorbing construction. Manufactured of UV-stable materials, these seat pads resist fading when exposed to the sun. FINDING THE RIGHT FIT

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control, and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

ESTABLISH YOUR POSITION

SUSPENSION

Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

COMFORT IS KEY

Bikes are a personal thing. Your bike should fit you, not the other way around. So when you throw a leg over it and pull away from the curb, you should be feeling there isn't another bike in the world you'd rather be sitting on. That's how a motorcycle equipped with the right gear can make your time on the road as rewarding as possible.

CHANGE YOUR ENVIRONMENT

A comfortable seat, hand and foot position triangle is essential if you are looking to pile up the miles. But it's not the only thing. Protection from the wind, temperature management, suspension settings and back support all factor into how far you can ride.

LIGHTEN THE LOAD

A fully-loaded touring bike is perfect for epic rides across the country, but when fighting city traffic on a daily commute, an H-D® Detachables™ Conversion Kit allows easy removal of the Tour-Pak® luggage for added maneuverability around town. Your ride can flex between a stripped-down street machine and a fully loaded touring beast in seconds.

A TOURING WINDSHIELD

By diverting air around the rider, a windshield can add hours of riding comfort. Select a windshield height that reduces turbulence and helmet buffeting for the rider and passenger.

B DETACHABLE SEAT

Seats are available to fit a variety of riders and riding styles. From a low-profile street look to cross-country comfort, quick-detach Seat Hardware lets you change at a moment's notice.

C DETACHABLE BACKREST

A Detachable Sissy Bar Upright and Passenger Backrest add support and comfort, and provide your passenger a sense of security without grabbing the rider around the waist.

TOURING COMFORT ESSENTIALS

DEFY THE WIND

At highway speed, you take the wind full-force in the chest, causing fatigue in your arms, neck and shoulders.
Take the pressure off with an easy-to-install detachable windshield.
Shaped to divert air, rain and road debris around the rider, a windshield can add hours of riding comfort.

EXTENDED COVERAGE

WIND SPLITTER

Wind Splitter windshields are shaped for effective airflow management and wow styling. The sweeping design adds height over a traditional low-profile wind deflector in the center where it counts.

To avoid looking through bug spots, condensation and road grime, select a windshield that tops out just below your line of sight.

Windshields — Road King®

A. WIND SPLITTER VENTED WINDSHIELD

Reduce helmet buffeting at speed. The Harley-Davidson® Detachables™ Wind Splitter Vented Windshield features an exclusive fingertip-adjustable center vent that reduces turbulence behind the windscreen. When open, the controlled airflow fills the negative pressure area behind the shield and helps to smooth the flow of air over the top of the screen and around the rider. The revised flow reduces helmet bobbing and neck fatigue so you can comfortably spend more time in the saddle. The open vent also provides cooling airflow to the rider at low speeds and in city traffic.

Engineered to provide the riding comfort of a larger windshield, this low-profile screen's contemporary contour sets it apart from the crowd. The shape keeps the windshield below your site line so you don't look through bugs and road grime and the detachable design means you can ride without the shield when the mood strikes. The shield is formed of hard-coated polycarbonate for strength and scratch resistance and the dark-smoked finish reduces glare. The slim polished stainless steel brackets mount to the Original Equipment rubber isolated docking points for ease of installation and removal.

Rider Comfort

A. COOLFLOW™ FAN

Keep your cool on a sweltering summer day. Engineered to maximize rider and passenger comfort in high temperature situations, the CoolFlow™ Fan is the perfect addition if your bike is subjected to parade duty, rush hour traffic, or extreme temperature environments. Unlike traditional fan kits that try to cool the engine by blowing air across the cylinders and often onto your legs, the CoolFlow Fan Kit keeps the riders comfortable by pulling air away from the rear cylinder and exhaust pipe, and directing it toward the ground. The fan suction generates a low pressure region near the riders to balance the natural “up and out” convection air flow in the area behind the engine. The wind-tunnel tested fan is tucked away above the transmission, and when combined with mid-frame air deflectors, significantly drops the temperature the seated rider experiences.

The CoolFlow Fan features switched On/Off/Auto operation. In the “ON” mode, the fan is active at low speeds, and will turn off when the bike reaches 40mph. As speed drops, the fan turns back on at 35mph. This logic program prevents the fan from cycling on and off during low speed changes. In the AUTO setting, the fan operates based on a combination of speed parameters and specific engine and ambient temperatures. Built to withstand the harsh motorcycle environment, the all-weather CoolFlow Fan is 100% waterproof and includes everything you need for installation. The plug-and-play design is integrated with the vehicle electronics, so “On/Off/Auto” fan operation is indicated in the odometer screen. Your dealer will enable this function in the Electronic Control Module (ECM) and you’re ready to roll.

B. FAN ASSISTED OIL COOLER

TOURING & TRIKE 425

Oil Coolers

B. FAN ASSISTED OIL COOLER

Keep your cool. This easy to install Oil Cooler features a thermostatically controlled fan that provides continuous flow of cooling air – even while the bike is idling in traffic or moving at low speed. Ideal for bikes that see parade duty and other low speed or continuous idle situations, the Fan Assisted Oil Cooler is also the perfect addition to a bike modified with high performance components. The fan automatically engages when the engine oil temperature rises, and when in operation, the Fan Assisted Oil Cooler can provide up to a 50 degree drop in oil temperature. And unlike other models, the Harley-Davidson® Fan Assisted Oil Cooler utilizes weather-rated fans and electronics that are designed for the harsh motorcycle environment. Engineered as a bolt-on replacement for the Original Equipment oil cooler, the Fan Assisted Oil Cooler is plug-and-play compatible with your bike's wiring harness. No splicing or rewiring is required.

62700204 **\$329.95**
Fits '17-later Touring models equipped with air/oil-cooled Milwaukee-Eight® engines. Does not fit models equipped with Twin Cooled™ engines. Not compatible with Oil Cooler Cover P/N 25700633 or 25700634. Original Equipment on oil-cooled Police and Freewheeler® models.

C. PREMIUM OIL COOLER KITS – TOURING

This oil cooler was designed specifically for Harley-Davidson to out-perform all other coolers in the industry. The cooler features a unique “Turbulator” system that evenly distributes oil across the cooling chambers. The air fins are designed to efficiently dissipate heat. The oil cooler has been designed to simplify installation and enhance performance. The large heat exchanger provides excellent cooling efficiency. The kit features a one-piece adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. Thermostat activates at 185°F (85°C). Kit comes complete with mounting hardware and precut oil lines.

C. PREMIUM OIL COOLER KIT – '09-'10 TOURING (26155-09A SHOWN)

Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

TOURING

COMFORT IS KING

The ability to spend hours behind the handlebars and rack up hundreds of miles without stopping is dictated by how you feel on your bike. The shape of the seat, the reach to the handlebars and the location of your feet are all major factors in how far you can travel in a day. But don't forget your passenger's needs — they have a stake in this ride as well.

THE RIDER & PASSENGER ENVIRONMENT

Accessories that impact the rider and passenger's physical contact with the motorcycle and the management of wind, temperature and road conditions should be your first consideration in building the ultimate touring machine.

ENJOY THE RIDE

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

TOURING SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

REACH®

Designed to place the rider in the best relationship to the controls, Reach® seats position short riders for a comfortable extension of the arms and legs.

LOW-PROFILE

These saddles combine radical styling with a “deep-in-the-bike” riding position. Long and lean, Badlander® seats bring you lower to the ground than most other seats.

TALLBOY®

The Tallboy® Seat allows additional leg and arm movement for the long-limbed rider and the long seating space permits fore and aft repositioning while on the open road.

HAMMOCK SEATS

Designed to maximize long-range comfort, Hammock Seats feature a sling-like suspension system that prevents bottoming and shelters the rider from pothole and highway expansion joint impacts.

TOURING SEATS

Designed for comfort, Harley® Hammock, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape that holds you in place and provides additional back support.

428 TOURING & TRIKE

Seating – Reach®

REACH® SEATS

Designed to position riders with a shorter inseam closer to the ground, Reach® Seats are shaped to place the rider in a comfortable and confident relationship to the hand and foot controls. The wide seating surface provides loads of support while riding and the narrow tapered nose brings your legs together for an easier reach to the ground at a stop. Reach Seats feature a stepped profile that provides back support and keeps the rider from sliding back during acceleration.

A. SUPER REACH SEAT

Get a little bit closer. Super Reach forward position seats are designed to move riders with a shorter inseam even closer to the controls and to bring the legs about 1.0" closer together so that your feet rest firmly on the pavement. The scooped bucket-shape saddle is enhanced with added back support padding to move the rider lower and forward.* The combination positions the rider closer to the hand and foot controls to offer both comfort and confidence. Seat can be equipped with optional rider backrest for added support and comfort.

*Measurements based on Original Equipment

Electra Glide® seat:

'09 models – 2.0" lower, 2.5" forward

'10-'13 models – 1.5" lower, 2.5" forward

'14-later models – .5" lower, 2.0" forward

B. REACH SOLO SEAT

From the custom metal Bar & Shield medallion to the sleek fast-back design, this seat is shaped to deliver the ergonomic position that a shorter rider needs. Sculpted and molded to ease the reach to the ground, this Reach Solo seat places the rider 3/8" lower and 1-1/4" forward when compared to the stock FLHX seat*. The narrow nose and the low overall height provides the rider with added confidence and control while the bike is at a stop or during parking maneuvers, while the generous seating width adds support for the long haul. And the seat's upturned tail moves you closer to the controls without confining you to one position. For maximum comfort and support, this seat is recommended for smaller framed riders between 5'-2" and 5'-8" tall.

*Measurement as compared to other seating options:

- Original Equipment 2016 Electra Glide® model seat – 1.25" lower, 0.8" forward

Seating – Tallboy®

TALLBOY® SEATS

The correct riding position can help a tall rider sit comfortably on the bike and avoid leg cramps and back strain during a long day in the saddle. For riders with a longer inseam, a Tallboy® Seat will put you on the road to fatigue-free riding. Designed to move the rider up and back from the stock seating position, a Tallboy Seat can eliminate the knees-high riding position and effectively places the body for a natural arm and leg reach to the controls. Tallboy Seats feature a bucket-shaped design for added support and a wide seating surface to reduce pressure on the tailbone.

A. TALLBOY SEAT – '14-LATER MODELS

This Tallboy Seat moves the rider back 1.5"* to provide much-needed arm and leg room for the long-limbed rider. The seat is sculpted to provide superior support and comfort, with a slight bucket shape to provide room to vary your riding position fore and aft. The seat's level seating surface does not pitch the rider forward, and the overall ride height is similar to stock Electra Glide® and Road Glide® Ultra seating. Passenger comfort will be maximized with the Tour-Pak® Luggage mounted in the rear most position. Tallboy seats can be equipped with an optional rider backrest (except Adjustable Style) for additional touring comfort.

*Measurements based on Original Equipment Electra Glide seat.

Seating — Road Zeppelin®

ROAD ZEPPELIN® AIR ADJUSTABLE SEATS

The open road. That's where we developed and tested the revolutionary comfort of the Road Zeppelin® Seat. This remarkable seat removes pressure points and hot spots by adjusting the amount of air contained in each bladder within the seat. Easy-to-reach rocker switches on the side of the seat control the built-in compressor, adding and bleeding off air with the quick push of a button to help relieve stress from the lower back, tail-bone or lower extremities. On a long run, occasionally inflating and deflating the air bladders reduces the "numb butt" effect by improving the blood flow to the extremities. So grab a seat. And enjoy the ride.

A. ROAD ZEPPELIN AIR ADJUSTABLE SEAT

The Road Zeppelin seat's ergonomically-friendly design combines a narrow front nose for ease of touching the ground at a stop with a wide seating surface for long range rider and passenger comfort. The easy-to-clean vinyl seat is finished with an embroidered Road Zeppelin logo that lets everyone see that you take riding comfort seriously. NOTE: Some Harley-Davidson® seats are made of leather. Fine leathers or other natural materials WILL gain "character," such as wrinkles or wear, with age. This is normal. A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Seating – Low Profile

LOW-PROFILE SOLO TOURING SEATS AND PILLIONS

Set your custom bagger apart with a Low-Profile Solo Seat that combines street-rod style with a surprising touch of comfort. Start with a shape that distributes your weight across a wide surface area to reduce pressure points. Then, add a tapered nose that brings the legs closer together to shorten the reach to the ground. The result is the slammed custom seat that you crave; with enough comfort and support to let you actually spend time in the saddle. Finish the look with your choice of matching passenger pillion, sissy bar pad and Tour-Pak® backrest pad.

TOURING VERSATILITY

Almost any Harley-Davidson® motorcycle can be outfitted to accommodate long-haul adventures. Solo and stripped down, two-up and fully loaded, or anywhere in between. With Harley-Davidson, it's about the versatility to do more with a wide range of detachable accessories to bring your story to the streets, no matter where they might lead.

PLAN FOR THE LONG HAUL

Solo commute? Or two-up run across the country? Harley-Davidson® Detachable Docking Hardware makes the conversion a simple proposition.

SOLO

Go it alone in style. Saddlebags hold a change of clothes, a rain suit and the basic travel gear. A Solo Rack and soft bag can store any souvenirs you pick up along the way.

TWO-UP

Take a day's ride on a bike built for two. Saddlebags carry clothes and the essentials, while a Sissy Bar Backrest Pad provides hours of passenger comfort on the open road.

TWO-UP WITH TOUR-PAK® LUGGAGE

The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully-equipped to go wherever you want, for as long as you want.

CHANGING YOUR BACKREST

With a Docking Hardware Kit installed, adding or removing an H-D® Detachables™ accessory is a simple "slide and click" proposition. Rotate the cam-lock to release the sissy bar from the rear docking points. Pivot the sissy bar forward, and lift it free from the front docking points.

LIGHTEN THE LOAD

A fully-loaded Touring bike is perfect for epic rides across the country, but when fighting city traffic on a daily commute, an H-D Detachables Conversion Kit allows easy removal of the Tour-Pak® luggage for added maneuverability around town.

F. CHOPPED ENGINE GUARD*

Create a sleek, slammed look on your custom bagger with the Chopped Engine Guard. This guard offers a slim, low-profile design that retains function while delivering a unique styling twist. The 1.25" Engine Guard features a slightly forward sweep that provides plenty of room around the brake and shift levers. Easy to install.

Fits '14-later Touring models (except Road Glide® and models equipped with fairing lowers).

D. CENTER STAND

Lifting your bike upright and off the side stand is ideal for cleaning and servicing, and reduces the space required for parking – handy where space is at a premium in a crowded garage, a small parking spot, or at a ride-in bike show. The robust chrome Center Stand attaches directly to the frame and does not reduce the lean angle. Designed to work with all Original Equipment suspension configurations and with Profile® suspension lowering kits, the adjustable feet can be set to lift the rear tire clear of the pavement, or to keep the rear tire on the ground for reduced lifting effort. The lifting lever is inconspicuously tucked away, and fits with all Harley-Davidson® Original Equipment and accessory footboards. Kit includes chrome stand, black mounting brackets, and all necessary installation hardware.

FINDING THE RIGHT FIT

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control, and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

ESTABLISH YOUR POSITION

SUSPENSION

Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

A. PREMIUM RIDE HAND-ADJUSTABLE TOURING SHOCKS*

Experience the ultimate in superior ride quality with these Premium Touring Shocks. These shocks utilize a single tube, nitrogen charged emulsion design. The design offers enhanced compression and rebound damping compared to the Original Equipment-style air adjustable shocks. This provides a controlled yet plush ride with much less bottoming. Larger chambers (40mm diameter pistons and 14mm rods) allow these shocks to react more quickly to impacts. This keeps the tires tracking while minimizing harshness transmitted through the frame. A simple knob behind the left saddlebag allows the rider to conveniently modify the spring preload via a hydraulic adjuster. Available in Standard Ride Height and Low Ride Height versions.

This pump was designed to allow safe and simple adjustment of the front and rear air suspension on Touring motorcycles. The swivel air hose simplifies valve stem attachment.

A. CUSTOM WRAPPED FRONT FENDER

Give your bike a big hug. This all-steel fender is shaped to show off the full profile of your 19" front wheel. Designed for mistake-proof installation, the fender is pre-drilled to fit Original Equipment fender mounting bosses, and does not require additional fender spacers or install kits. Available in Color-Matched, Vivid Black or primed and ready-to-paint finish.

Fits '14-later Touring models equipped with a 17", 18" or 19" wheel and tire combination. Does not fit with Fender Tip Assembly P/N 59600003 or 59600006. Does not fit Trike models.

B. CUSTOM STRETCHED SIDE COVERS

Add a long, lean look to the profile of your Touring bike. Shaped to flare out and down the saddlebag face, the sleek side covers complement the body lines and eliminate the saddlebag guard clearance notch at the lower corner for a seamless flow. And unlike some aftermarket designs, these side covers fit without significantly compromising the available passenger foot space. The one-piece covers are a snap-in replacement for the Original Equipment covers, and require no bonding or modification for installation. Available in Color-Matched, Vivid Black or primed and ready-to-paint finish.

PRO STREET TUNER

All Screamin' Eagle® performance upgrades require Engine Control Module (ECM) recalibration, also known as tuning. The best method for tuning your stage upgrades is with the Screamin' Eagle Pro Street Tuner.

- Provides starting calibrations developed by the Screamin' Eagle team
- Offers ability to dial in bike-to-bike variations and different air cleaner and exhaust combinations
- Offers Guided Smart Tune process which walks user through tuning with or without a dyno
- Allows adjustments within a safe range for optimum performance excitement
- Maximizes the performance output while maintaining 50-state U.S. EPA compliance
- Retains the Motorcycle Original Equipment Manufacturer's Warranty

SCREAMIN' EAGLE® PRO STREET TUNER

The Screamin' Eagle Pro Street Performance Tuner is designed to simplify management of engine operating parameters as performance modifications are made. Once installed, the kit will allow you to adjust key parameters or simply upload the latest Engine Control Module (ECM) calibrations to match your bike's state-of-tune. Start with a high-flow air cleaner and Street Performance mufflers and upload the calibration that provides the best performance mix. Add additional Stage Upgrades later, and you simply upload the proper ECM calibration to match the model and hardware. Plus, you have free online access to the latest factory calibrations.

Ideal for real-world street performance applications, the Pro Street Tuner provides the adjustability to account for bike-to-bike variation and for changes to cams, heads, intake and exhaust while maintaining closed-loop fuel control for fuel economy in the part-throttle operating range. Unlike other aftermarket tuners, The Screamin' Eagle Pro Street Tuner actually talks directly to your motorcycle's ECM and re-programs the motorcycle's operating system. It isn't a piggyback system that tries to fool the ECM into adding more fuel or changing the ignition timing. The Pro Street Tuner plugs into the bike's data port, so no splicing or under-seat hardware is required.

After you upload the proper ECM calibration, dial it in with the Smart Tune function. The guided Smart Tune process walks you through the process to; find the right calibration for your build, set the tuner to a data collection mode and then allows you to incorporate the data after the ride with just a few clicks. The ECM calibration is then custom fit for your bike. The module will store up to 15 minutes of run-time data information that can be downloaded to your PC, allowing the rider or technician to view and evaluate the bike's air/fuel ratio, O2 sensor readings, engine speed and temperature, RPM and vehicle speed, throttle position, spark advance and many more performance characteristics. The Vehicle Communications Module (VCI) will also record and display service codes for troubleshooting and diagnostics. The kit includes the VCI module and unlimited access to the latest software updates and calibrations available from Screamin' Eagle. Tuner Cable kit sold separately.

The Pro Street Tuner software includes impressive features:

- Features a guided Smart Tune process to enable quick navigation through the software, whether you are new to tuning or an experienced user.
- Smart Tune Live – a dynamic and visual method to track and capture engine data simply by running the vehicle through a range of RPM and throttle positions. This feature reduces the time to modify existing VE (Volumetric Efficiency) tables which are then analyzed and tuned. Smart Tune Live works on models with factory-installed O2 sensors only.
- Adjustability to Spark Advance, Throttle progressivity, and Volumetric Efficiency to custom tune the performance combination.
- 50-State U.S. EPA compliant.

The Pro Street Tuner permits tunability to optimize performance and drivability without compromising fuel efficiency, emission levels, engine durability, or 50-State U.S. EPA compliance. And unlike other race tuners or engine controllers, the Screamin' Eagle Pro Street Tuner does not impact your Harley-Davidson factory warranty coverage.

A. SCREAMIN' EAGLE SMART TUNE PRO AUTOMATIC TUNING MODULE

A. SCREAMIN' EAGLE® SMART TUNE PRO AUTOMATIC TUNING MODULE*

Smart Tune PRO works with the Screamin' Eagle Pro Street Tuner to automatically adjust your bike for the combination of performance components, climates, and vehicle load conditions you are operating in. You just install the upgraded wide-band oxygen sensors in the exhaust headers, download the calibration that the Screamin' Eagle engineers have developed as a starting point, then simply drive down the road and let Smart Tune Pro do the work. Ride from the flatlands of South Dakota to the mountains of Colorado without a compromise in performance.

Smart Tune PRO constantly monitors the operating parameters of your motorcycle, and automatically adjusts the bike's Electronic Control Module (ECM) to maximize performance in your current riding conditions. Smart Tune Pro utilizes wide-band O2 sensors that read oxygen levels in the exhaust stream to determine the optimum air/fuel ratio your bike needs at this very moment. Smart Tune Pro analyzes the data and automatically makes real-time tuning adjustments to the ECM. Unlike the standard narrow-band O2 sensors that only provide feedback in the part-throttle cruising range, the wideband sensors can read and adjust tuning throughout the part throttle cruising and full-throttle acceleration operating range.

Screamin' Eagle Smart Tune Pro was developed by the Screamin' Eagle engineering team in concert with the design of your Harley-Davidson® motorcycle. It is fully factory supported, and optimized to maximize performance while maintaining drivability and engine longevity. Smart Tune PRO is 50-state EPA compliant* and does not impact the H-D factory warranty. Kit includes the Smart Tune PRO module with plug-in wiring harness, two M18 wideband O2 sensors, and access to free software updates, future calibrations and free on-line training modules. Screamin' Eagle Pro Street Tuner and model-specific installation hardware is sold separately. ***Pending Regulatory Approval. Refer to the product information at www.H-D.com/parts for status.**

MILWAUKEE-EIGHT® POWERTRAIN

Screamin' Eagle® Stage upgrades offer complete street-compliant performance configurations engineered to generate specific torque and horsepower gains. Eliminating all the guesswork and trial-and-error testing normally associated with engine modifications, Stage upgrades include everything you need to enhance your bike's performance. You can start with key components that give you a bump in power right now, add components as time and budget permits, or you can go for it all at once.

STAGE I

INTAKE + EXHAUST + TUNING

The easiest and most cost effective step to improve your motorcycle's performance is to increase the air flow into and out of the engine. A high-flow air cleaner and system-matched slip-on mufflers provide horsepower and torque improvements you can feel throughout the RPM range, and serve as the core components for all performance upgrades. ECM calibration is required to tune the fuel flow and timing required to accommodate the improved air flow.

Stage I upgrade can be installed without engine disassembly. No special tools are required. Requires ECM tuning.

STAGE II

STAGE I + CAM UPGRADE

Adding performance cams to a Stage I equipped bike is the next step to improved performance. Cam choices allow you to tailor the engine's performance to your specific needs. A torque cam offers on-demand throttle response from low- to mid-RPM at cruising speed. A power cam targets high-rpm, wide-open throttle response that keeps pulling right up to the redline. ECM calibration tuning is required to accommodate the increased valve timing, and performance valve springs may be required for high-lift cams.

Stage II upgrade requires minor engine disassembly to replace the cam. Adjustable pushrods allow cam installation without removing the rocker box. Special tools and ECM tuning are required.

STAGE III

STAGE I + CAM, BIG BORE CYLINDERS & PISTONS

The next step on the performance journey is to build a bigger engine. An increase in engine displacement allows the engine to swallow more air and fuel, a higher compression piston squeezes the air/fuel into a more volatile mixture, and when combined, generates more power when ignited. A displacement and compression increase provides torque increases throughout the entire RPM range with a 15-25% improvement in the mid-range power. ECM calibration tuning is required to adjust fuel flow and timing to accommodate the increased displacement.

Stage III bolt-on upgrade requires removal of the engine's top-end and opening the cam chest. Engine remains in the chassis and no machining is required. Special tools and ECM tuning are required.

STAGE IV

STAGE I + CAM, BIG BORE CYLINDERS, PISTONS, CYLINDER HEADS & THROTTLE BODY

To maximize the impact of the increased displacement gained with Stage III updates, the addition of free-flowing ported cylinder heads and a big bore throttle body top off the performance build. Designed to satisfy the high RPM, throttle twisting rider, the Stage IV update delivers 20-30% increase in power that keeps pulling right up to the redline, without sacrificing mid-range torque. ECM calibration tuning is required to add more fuel, and a higher-lift cam may be required to deliver maximum power.

Stage IV bolt-on upgrade requires removal of the engine's top-end and opening the cam chest. Engine remains in the chassis and no machining is required. Special tools and ECM tuning are required.

Whether you're a Softail® or Touring rider, Screamin' Eagle offers the full gammut of Stage upgrades for you to pick the best solution for you. THE BASICS

- An increase in engine displacement allows the engine to swallow more air and fuel, a higher compression piston squeezes the air and fuel into a more volatile mixture and when combined, generates more power when ignited
- Displacement increases are accomplished with larger cylinders, matching pistons, and the proper cam upgrade

A. SCREAMIN' EAGLE® MILWAUKEE-EIGHT® ENGINE STAGE III KIT

This kit was developed for the rider looking for a solid seat of the pants increase you can feel – every time you roll on the throttle. The increase in displacement and the bump in compression deliver a significant increase in torque and power over stock while restoring the sensation of riding solo when taking that long trip with a passenger and luggage. The Stage III 107 to 114 upgrade delivers up to 39% more power, and the 114 to 117 upgrade increases power by up to 24% when compared to the Original Equipment engine configurations. The increased compression and cam upgrade will also deliver 17% improvement over a stock CVO117 configuration.

THE BASICS

- Highest level performance upgrade available to provide a maximum increase in displacement, compression and flow
- Higher-flowing CNC ported cylinder heads and larger bore throttle body increase the velocity and feed large volumes of air and fuel into the engine, which maximizes power on a larger displacement engine
- Combines ported cylinder heads and larger throttle body in combination with cylinders, matching pistons and proper cam

B. SCREAMIN' EAGLE® MILWAUKEE-EIGHT® ENGINE STAGE IV KIT

This Stage IV Kit was developed to deliver maximum horsepower from the Milwaukee-Eight® engine - all the way to the redline. The system-matched combination of larger displacement cylinders, free flowing CNC-Ported cylinder heads and a cam with the highest available valve lift are the starting point to building the perfect engine for the performance junkie. The addition of the large 64mm bore throttle body and high-flow injectors provides great acceleration from first gear through sixth and exceptional response at the twist of the throttle. Designed for a high level of flexibility, this package is ideal for riders who want stomp pulling torque throughout the RPM range and also crave plenty of arm-pulling acceleration when you whack the throttle. TWIN CAM POWERTRAIN

Screamin' Eagle® Stage upgrades offer complete street-compliant performance configurations engineered to generate specific torque and horsepower gains. Eliminating all the guesswork and trial-and-error testing normally associated with engine modifications, Stage upgrades include everything you need to enhance your bike's performance. You can start with key components that give you a bump in power right now, add components as time and budget permits, or you can go for it all at once.

STAGE I

INTAKE + EXHAUST + TUNING

The easiest and most cost effective step to improve your motorcycle's performance is to increase the air flow into and out of the engine. A high-flow air cleaner and system-matched slip-on mufflers provide horsepower and torque improvements you can feel throughout the RPM range, and serve as the core components for all performance upgrades. ECM calibration is required to tune the fuel flow and timing required to accommodate the improved air flow.

Stage I upgrade can be installed without engine disassembly. No special tools are required. Requires ECM tuning.

STAGE II

STAGE I + CAM UPGRADE

Adding performance cams to a Stage I equipped bike is the next step to improved performance. Cam choices allow you to tailor the engine's performance to your specific needs. A torque cam offers on-demand throttle response from low- to mid-RPM at cruising speed. A power cam targets high-rpm, wide-open throttle response that keeps pulling right up to redline. ECM calibration tuning is required to accommodate the increased valve timing, and performance valve springs may be required for high-lift cams.

Stage II upgrade requires minor engine disassembly to replace the cam. Adjustable pushrods allow cam installation without removing the rocker box. Special tools and ECM tuning are required.

STAGE III

STAGE I + CAMS, BIG BORE CYLINDERS & PISTONS

The next step on the performance journey is to build a bigger engine. An increase in engine displacement allows the engine to swallow more air and fuel, a higher compression piston squeezes the air/fuel into a more volatile mixture, and when combined, generates more power when ignited. A displacement and compression increase provides torque increases throughout the entire RPM range with a 15-25% improvement in the mid-range power. ECM calibration tuning is required to adjust fuel flow and timing to accommodate the increased displacement.

Stage III bolt-on upgrade requires removal of the engine's top-end and opening the cam chest. Engine remains in the chassis and no machining is required. Special tools and ECM tuning are required.

STAGE IV

STAGE I + CAMS, BIG BORE CYLINDERS, PISTONS, CYLINDER HEADS & THROTTLE BODY

To maximize the impact of the increased displacement gained with Stage III updates, the addition of free-flowing ported cylinder heads and a big bore throttle body top off the performance build. Designed to satisfy the high RPM, throttle twisting rider, the Stage IV update delivers 20-30% increase in power that keeps pulling right up to the redline, without sacrificing mid-range torque. ECM calibration tuning is required to add more fuel, and a higher-lift cam may be required to deliver maximum power.

Stage IV bolt-on upgrade requires removal of the engine's top-end and opening the cam chest. Engine remains in the chassis and no machining is required. Special tools and ECM tuning are required.

F. SCREAMIN' EAGLE® HIGH-FLOW EXHAUST SYSTEM WITH STREET CANNON MUFFLERS

The Screamin' Eagle® High-Flow Exhaust system provides bolt-on performance by reducing the catalyst restrictions and improving exhaust flow. This exhaust system is optimized for use on engines producing 80+ horsepower and works great with Screamin' Eagle Stage Kits. The kit replaces the stock head pipe and mufflers with large diameter, free-flowing head pipes and matching mufflers. The muffler inlet diameter has been increased to 2.25" to enhance exhaust gas scavenging and the catalysts have been relocated to the mufflers to enhance flow. The proof is in the horsepower and torque numbers. Dial the system to your motorcycle by using the Screamin' Eagle Pro Street Tuner to tune your ECM specifically to match your performance upgrades.

The large 4" diameter Street Cannon mufflers are tuned to provide a deep bass exhaust note and a healthy rumble at idle, and that famous Harley sound throughout the RPM range. 50-State U.S. EPA compliant.

Fits '10-'16 Touring models (except CVO™). Does not fit Trike models. Separate purchase of Screamin' Eagle 4" endcaps required. All models require ECM calibration for proper installation.

TWIN CAM STAGE II UPGRADE

Camshafts are a fundamental ingredient in the performance recipe, because they control the timing and duration of all major engine events. They are the primary means by which you can tune your engine's horsepower and torque output. Every cam has unique lift and overlap performance characteristics, which means you need to select cams based on exactly the kind of power you're looking for.

A. SCREAMIN' EAGLE® TWIN CAM PERFORMANCE CAMS

Kits include front and rear cams. Splined rear cam is included for exceptional load handling capability. Gaskets and bearings not included. Cam Installation Kit P/N 17045-99C (sold separately) includes all required gaskets, bearings and seals for proper installation. Dealer installation is recommended and special tools are required for proper installation.

SE-255 CAM KIT

The ultimate in torque cams, this cam offers substantial increase in low end torque for engines up to 110 cubic inches with compression ratios up to 10 to 1. The low end torque increases are great for heavy bikes or for the person who routinely shifts below 4500 RPM and wants the power available to pass without downshifting. The cam still makes peak power above 5000 RPM so people with lighter bikes will enjoy the torque increases without feeling like the bike runs out of air at higher engine speeds. 50-State U.S. EPA compliant.

25638-07

\$329.95

For use on '09-'13 Dyna®, Softail®, and '09-'13 Touring and Trike models with 103CI and 110CI engines. All models require ECM calibration for proper installation. Labor cost not included. See Dealer for details.

SE-259E CAM KIT

Developed specifically for big displacement Twin Cam engines, this cam has a modern lobe design that allows for higher valve lifts for a given duration. A high-lift version of the SE-211 camshaft, this cam works great with 103 cubic inch and larger engines with free-flowing intake and exhaust. It can be used with stock heads (updated with race springs) and high-compression pistons for even more torque than a SE-211 cam or can be coupled with any of the performance heads to realize the full power potential. 50-State U.S. EPA compliant.

25482-10

\$329.95

For use on '11-'15 103CI and 110CI Touring and Trike models. Installation requires separate purchase of Performance Valve Spring Kit P/N 18013-03A. All models require ECM calibration for proper installation. Labor cost not included. See Dealer for details.

SE-585 CAM KIT

This cam is a great match for riders of heavy Touring bikes looking for big torque at the low end. Just a quick downshift to fourth gear results in an effortless pass of that slow moving tractor-trailer ahead of you. This cam provides an early hit of torque at the low end of the RPM spectrum. A unique combination of lift, cam lobe duration and an enhanced cam profile ramp provides a performance boost you can feel. The cam's QRD (Quiet Ramp Design) delivers high torque throughout the RPM range while reducing valve train noise. 50-State U.S. EPA compliant.

25400117

\$329.95

For use on '14-'16 Touring models with the use of a 58mm Throttle Body. Also fits '14-'16 CVO™ Touring models with or without the use of a 58mm Throttle Body. Does not fit Trike models. Installation requires separate purchase of Performance Valve Spring Kit P/N 18013-03A. All models require ECM calibration for proper installation. Labor cost not included. See Dealer for details.

NOTE: Separate purchase of Cam Drive Retention Kit P/N 25566-06 and Cam Spacer Kit P/N 25928-06 may be required. These kits contain five different spacers to achieve proper sprocket alignment. Individual spacers can be purchased separately.

Twin Cam Stage II Upgrade

A. SCREAMIN' EAGLE® BILLET CAM SUPPORT PLATE WITH HIGH-VOLUME OIL PUMP

A great upgrade for any performance motor. The Billet Cam Support Plate is manufactured from billet aluminum with pressed-in bronze bushings and is pre-assembled with the crankshaft bushing and oil pressure relief valve. Aluminum is specified at 6061 billet plate, heat-treated to T6 specifications with a surface-hardened anodized finish to provide superior strength, rigidity and durability. CNC-precision machining ensures precise dimensions and constant material thickness across the plate, enabling perfect alignment of cams and chains. Cam bushings are made from 660 bronze materials to provide enhanced wear resistance and to stand up to increased loads from the high lift cams common in large displacement motors. The improved Screamin' Eagle® high-flow oil pump provides higher pressure when the oil is hot to keep pressure drops to a minimum and increases the oil supply by 16% and the scavenging by 29% over the '06-'17 Original Equipment oil pump.

25282-11 **\$429.95**

Fits '06-'17 Dyna® and '07-'17 Softail®, and '07-'16 Touring and Trike models. Installation requires separate purchase of Cam Service Kit P/N 17045-99D and Drive Gear Retention Kit P/N 25566-06.

These Hydraulic Cam Chain Tensioners will significantly outlast the spring loaded tensioners and are an ideal addition to an engine modified for improved performance. In addition, '02-'06 models utilize a Twin Cam 96 single row front roller chain and sprocket (included in kit). '99-'01 models use Original Equipment front silent chain and sprocket to retain the cam position sensor function. BOLT-ON BIG BORE CYLINDERS

In the past, the only way to increase the bore of your 103 or 110 cubic inch Twin Cam V-Twin motor was to tear down the motor and re-bore the engine cases to fit larger bore cylinder spigots. It was a labor-intensive and expensive process. The Screamin' Eagle team has engineered a 4" Big Bore Cylinder and Piston package that increase the internal bore from 3-7/8" to 4", without increasing the outside diameter of the cylinder spigot. The cylinder slips into the existing case bore without modification.

SCREAMIN' EAGLE

SPORTSTER® POWERTRAIN

Screamin' Eagle® Stage upgrades offer complete street-compliant performance configurations engineered to generate specific torque and horsepower gains. Eliminating all the guesswork and trial-and-error testing normally associated with engine modifications, Stage upgrades include everything you need to enhance your bike's performance. You can start with key components that give you a bump in power right now, add components as time and budget permits, or you can go for it all at once.

STAGE I

INTAKE + EXHAUST + TUNING

The easiest and most cost effective step to improve your motorcycle's performance is to increase the air flow into and out of the engine. A high-flow air cleaner and system-matched slip-on mufflers provide horsepower and torque improvements you can feel throughout the RPM range, and serve as the core components for all performance upgrades. ECM calibration is required to tune the fuel flow and timing required to accommodate the improved air flow.

Stage I upgrade can be installed without engine disassembly. No special tools are required. Requires ECM tuning.

Street legal and/or street compliant statements refer to product meeting 50-State emissions and noise standards in the United States.

*14-later XL1200 Stage II with Heavy Breather A/C & Street Cannon Mufflers

STAGE II

STAGE I + CAM UPGRADE

Adding performance cams to a Stage I equipped bike is the next step to improved performance. Cam choices allow you to tailor the engine's performance to your specific needs. A torque cam offers on-demand throttle response from low- to mid-RPM at cruising speed. A power cam targets high-rpm, wide-open throttle response that keeps pulling right up to redline. ECM calibration tuning is required to accommodate the increased valve timing, and performance valve springs may be required for high-lift cams.

*14-later XL1200 Stage II with Heavy Breather A/C & Street Cannon Mufflers

Stage II upgrade requires minor engine disassembly to replace the cam. Special tools and ECM tuning are required.

STAGE IV

STAGE I + CAMS, PISTONS, CYLINDER HEADS & THROTTLE BODY

For maximum performance improvement, the addition of high-compression pistons, free-flowing ported cylinder heads and a big bore throttle body top off a performance build. The large diameter throttle body and port-matched intake manifold deliver huge volumes of fuel and air to the engine, the smooth passages and larger valves easily dump the mixture into the engine, and the high compression pistons squeeze the air/fuel into a more volatile vapor. When ignited, the result is a major power increase. Designed to satisfy the high RPM, throttle twisting rider, the Stage IV update delivers 20-30% increase in power that keeps pulling right up to the redline, without sacrificing mid-range torque. ECM calibration tuning is required to add more fuel, and a higher-lift cam may be required to deliver maximum power.

*1200 Stage IV with High-Flow A/C & Street Cannon Mufflers

Stage IV bolt-on upgrade requires removal of the engine's top-end and opening the cam chest. Engine remains in the chassis and no machining is required. Special tools and ECM tuning are required.

Street legal and/or street compliant statements refer to product meeting 50-State emissions and noise standards in the United States.

F. SCREAMIN' EAGLE VARIABLE PRESSURE CLUTCH

Get more performance from the Original Equipment clutch. The Screamin' Eagle® Variable Pressure Clutch is designed to help put the added power from a Screamin' Eagle Stage Kit to the pavement. This bolt-on kit harnesses the centrifugal force of spinning weights to increase the clutch capacity as engine speed increases. The mechanism applies increasing pressure to the stock clutch pressure plate as RPM rises. The result: High torque-handling capabilities without increasing clutch lever effort at idle. The Variable Pressure Clutch also provides smoother clutch disengagement at lower speed. Kit fits behind most stock derby covers with no modifications. See installation manual for additional accessory derby cover fitment information.

To match the performance demands of your engine, team the Variable Pressure Clutch with your choice of clutch diaphragm springs. We recommend the higher capacity Screamin' Eagle Diaphragm Spring P/N 37951-98 for major performance upgrades.

E. SCREAMIN' EAGLE PERFORMANCE SLIPPER CLUTCH FOR VRSC™ MODELS

This clutch offers reduced lever effort and improved performance. The unique "slip and assist" ramp system opens the two halves of the clutch hub slightly during high loads to the drivetrain, allowing a moderate slip that reduces shock to the drivetrain during rapid downshifting. The resulting reduction in wheel hop allows maximum contact between the tire and the road in wet or slippery conditions. Clutch lever effort is also reduced by 20% in 1130cc and 30% on 1250cc applications.

SCREAMIN' EAGLE® 645

6-Speed Transmission

F. SCREAMIN' EAGLE® 6-SPEED TRANSMISSION AND GEAR SET

Designed from the ground up, the Screamin' Eagle® transmission incorporates many of the best Original Equipment features, like a late-style shifting mechanism and a newly designed "shift ring" system to make this the smoothest shifting Harley-Davidson® transmission available. The "shift ring" system is similar to the system used in the VRSC™ transmission and it slides on the shafts to mate into the gears. This eliminates sliding heavy gears to accomplish the shift and results in smooth, precise and light effort shifting. Sixth gear is a true overdrive, at a .89:1 ratio and the first five gears mimic today's proven 5-speed ratios. The overdrive feature allows you to run a lower engine RPM in sixth gear, at any given road speed. Lower RPM can result in lower vibration, longer engine life and smoother cruising. The Screamin' Eagle 6-Speed Transmission is available as a complete transmission or as a replacement gear set and can be matched with hydraulic or cable-operated clutch controls.

Screamin' Eagle 6-Speed Transmissions feature forged chrome "trap door," forged shifter forks and forged and precisely ground gears. No speedometer or exhaust mount modifications are required. Complete transmissions are ready to install into the chassis and the 6-Speed Gear Set Kits are designed to replace the stock gear set without removing the transmission. Gear Set Kits require slight modification (template included) to the Original Equipment transmission case and include all necessary installation hardware.

Unlike an engine rebuild from the repair shop down the street, the Harley-Davidson® LongBlock is manufactured from 100% new Original Equipment components, and is built to the latest factory specifications. Engine includes upgraded Screamin' Eagle® lefty crankcase bearing, Screamin' Eagle® cam bearings and Screamin' Eagle performance tappets to handle higher stress loads and performance upgrades. In addition, '99-'06 LongBlocks are upgraded with late-model hydraulic cam tensioners, high-volume oil pump and billet cam plate. '07-'16 103CI and 110CI engines feature factory-installed Automatic Compression Releases.

WHAT DOES THE H-D® LONGBLOCK INCLUDE? The crankcase is pre-assembled with flywheels, connecting rods, bearings, seals, cylinders, pistons, rings, heads, valves, valve springs, tappets and pushrod covers. Also included and ready for Dealer installation are top end rocker arm supports, rocker arms and shafts, pushrods, and breathers. The LongBlock also includes cam support plate, cam plate bearings, cam and timing chain drive, hydraulic tensioners and all required gaskets and new hardware.

ARE UPGRADES AVAILABLE?* You can choose silver or black-highlighted engines to match your styling direction. Bikes originally equipped with Twin Cam 88® engines can upgrade to 95 or 103CI displacement, and Twin Cam 96™-equipped models can be repowered with 103 or 110CI engines, based on specific model fitment. Upgrades require model-specific ECM recalibration (sold separately). Only available in North America.

WHAT ELSE DO I NEED? LongBlock is sold without cam shafts, lower rocker boxes, upper rocker box covers, or cam cover. You have the option to re-install your current cams and covers, or select from a wide assortment of performance and custom engine cover options.

FAST AND EASY: Just take your Harley® motorcycle to your authorized dealership. They will remove the engine from the frame, ship the left crankcase half to Harley-Davidson, and in a short time, you will have a new LongBlock back, ready for the dealer to reinstall in your bike. Your engine retains its original Vehicle Identification Number (VIN) for easy title exchange and registration.

**Displacement upgrades are available for vehicles previously equipped with street compliant big bore kits only.*

**Also available:
ENGINE COVER KITS**

ENGINE TRIM COLLECTIONS

Make It Your Own. Build a bike that fits your sense of style.

To give your bike a clean and seamless appearance, select components from one of the Harley-Davidson® collections. You'll be one step closer to the look you've been dreaming about.

HARLEY-DAVIDSON® COLLECTIONS

One of the easiest ways to personalize your bike is by layering on elements from a well-chosen custom collection. A sprinkling of chrome or a dusting of brass across the profile ties the bike together for a cohesive front-to-back look. Start by selecting a collection that matches your style, and then determine how far you want to go.

COMPLETE THE LOOK

Whether it's flames, skulls or classic chrome, installing a collection draws the eye from one end of the bike to the other. So, add them in steps or all at once – for a big visual impact.

A. BRASS COLLECTION

The authentic alternative to the typical chrome-covered or blacked-out look, the Harley-Davidson® Brass Collection delivers a warm, hand-crafted look to your custom ride. These minimalistic living finish components make a garage-built styling statement and are the ideal addition to your stripped-down bobber or café motorcycle. Artistically manufactured from solid brass, these components feature a natural antique finish that will age and patina when exposed to the elements. Unlike bright polished and plated brass trim, these heritage-finished components are subtle additions to your ride and don't compete for attention with the rest of the bike. Brass Collection components are factory treated with wax to slow the aging process, and are shipped with cleaning and care instructions.

CONTROLS

The most visual contact point you have with your motorcycle is where your hands and feet meet the controls. Choose a handlebar suitable for your physical needs. Then select grips, hand controls, footpegs and mirrors to underscore the style of your ride.

TOUCH POINTS

From a rider's perspective, the controls are one of the most visual parts of the bike. They are the first thing you touch when you drop into the saddle, and what you see every mile you ride. That makes your controls a prime candidate for special treatment. Styled to put an integrated look just a few wrench turns away, installing one of our hand and foot control collections is a solid first step to an all-out custom journey.

BRASS COLLECTION

The authentic alternative to the typical chrome-covered or blacked-out look, the Harley-Davidson® Brass Collection delivers a warm, hand-crafted look to your custom ride. These minimalistic living finish components make a garage-built styling statement and are the ideal addition to your stripped-down bobber or café motorcycle. Artistically manufactured from solid brass, these components feature a natural antique finish that will age and patina when exposed to the elements. Unlike bright polished and plated brass trim, these heritage-finished components are subtle additions to your ride and don't compete for attention with the rest of the bike. Brass Collection components are factory treated with wax to slow the aging process, and are shipped with cleaning and care instructions.

Hand Grips – Heated

HEATED HAND GRIPS

Keep comfortable on those cool mornings or frigid night rides. Warm hands have a major impact on overall body comfort and sometimes gloves just aren't enough. These thermostatically controlled grips feature variable heat settings controlled with a military grade resistor and use automatic temperature monitoring to adjust to ambient temperatures. With both hands on the grips, they will remain at a constant temperature regardless of changes in outside temperature. The self-contained control circuit and control knob means you have no additional switches or controller boxes to mount and the grips are switched on/off with the ignition to avoid draining your battery. The glueless grip design allows grip removal if you change handlebars or motorcycles.

A. HEATED HAND GRIPS – AIRFLOW

Wrap your fingers around the chrome ridge for a sweet tactile feel. These grips combine a traction-grip crosshatch rubber surface with a comfortable 1.6" diameter for excellent control in wet or dry weather. These grips have been thermally mapped to provide more uniform heat and are designed to achieve a maximum operating temperature approximately 20° Fahrenheit warmer than previous accessory heated grips for added warmth during cold rides.

The flash of chrome. It's the first thing that everyone sees. And the one thing that everyone remembers.

Dressing your bike's hand controls in chrome is one of the first steps in building a complete custom ride. After all, the hand controls are the one visual and physical connection you have with your bike every minute you are in the saddle. Harley-Davidson offers all the components you need to make the custom conversion.

INSTANT GRATIFICATION

Combining chrome and custom replacement parts creates a truly unique look and feel. A chrome master cylinder kit, a set of chrome switch housings, custom hand grips and braided control cables finish the custom installation.

COMFORT, STYLE OR BOTH?

Every person is unique. Your overall height, arm reach, upper body length and riding style all dictate your relationship to the bike's controls. Add in the desire for a unique, custom look and your handlebar options multiply exponentially.*

YOUR RIDING POSITION

DRAG HANDLEBAR*

Narrow, flat and more aggressive, drag bars provide a straight elbow and neutral hand and wrist position. For maximum comfort, drag bars can be positioned with curved or straight risers to minimize stretch to the controls.

BEACH HANDLEBAR*

Low and wide, a beach bar spreads your arms and gives you room to breathe. Ideal for the rider with long arms, beach bars can be a little too wide for many riders. While selecting a bar, make sure you can reach the hand controls when the handlebar is fully turned.

APE HANGER & TALLBOY® HANDLEBAR*

Tall and wide, ape hanger and Tallboy® handlebars provide a classic "fists-in-the-wind" look and can add long-haul comfort for riders with long arms. Because handlebar height is regulated in many areas, check local laws before installing a tall handlebar.

CHIZELED HANDLEBAR*

For cutting edge style, a Chizeled Bar combines the hands-up feel of a mini-ape with the narrow width of a drag bar. The bar's shoulder-width design keeps the elbows in and the arms straight ahead, and the wrist and hands fall in a neutral palms-down grip.

CHOOSING YOUR HANDLEBAR

RISE is the vertical distance between a handlebar’s tip and its base. Adding risers to bars that sit too low can help put hand grips into your sweet spot.

PULL BACK is the distance the handlebar tips come back toward the rider. Greater pull back can eliminate the long reach to the bar for a shorter rider.

WIDTH is measured from tip-to-tip. Make sure the bar isn’t too wide so it pulls your hands off the grips when turning.

KNURL CENTER is the distance between the center line of the bar’s knurling. The measurement should match the riser dimension to maximize clamping pressure.

*NOTE: Installation of some handlebars and risers may require a change in clutch and/or throttle cable and brake lines for some models. Handlebar height is regulated in many areas. Check local laws before installation. **1.25" Fat Bar base necks down to fit 1.0" handlebar clamp.

A. EXTREME REACH® HANDLEBAR*

Extensively tested with a panel of riders between 5'-0" to 5'-5" tall, this Extreme Reach® Handlebar and recommended riser combination was proven to be the most ergonomically pleasing handlebar for many Dyna® and Softail® models. Shaped to provide the ideal balance of pull back and width, this handlebar produces an overall pull back of 11.0" and a tip-to-tip width of 30.0" when combined with Curved Riser Kit P/N 56266-09 (sold separately). Your hands fall naturally in place and the narrow width reduces your stretch while making low-speed turns and parking lot maneuvers.

Fits '06-'17 Dyna (except '14-'17 FXDL) and '00-'17 Softail models (except FLSS, FLSTFBS, FXCW, FXCWC, FXS, FXSB, FXSTD and Springer™). Does not fit CVO™ models. All models require separate purchase of additional installation components.

Handlebars – Batwing

CHOOSE YOUR BATWING HANDLEBAR

Just about every model of Harley-Davidson® motorcycle features a different stock handlebar. Selected to complement the style or use of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.

Choosing a bar for your batwing fairing-equipped model is about more than just style – it's about how you approach the road. Where the bar positions your hands, wrists, and arms directly affects how you feel on your motorcycle. For every set of bars, there are three factors at work: rise, pullback and width. These three measurements determine your reach to the hand controls and, therefore your overall feeling of comfort and control.

C. ELECTRA GLIDE® CHROME HANDLEBAR*

Replace your stock polished bar with this 1.0", chrome handlebar that allows you to tuck the wires inside the bar for a clean, finished look. Identical shape to the Original Equipment Electra Glide and Street Glide bar, this high-quality chrome-plated handlebar is designed to be compatible for use with TGS-equipped Electra Glide® models.

A. BATWING REACH® HANDLEBAR

The Batwing Reach® Handlebar is shaped to provide all-day riding comfort for smaller stature riders. Extensively tested by a panel of riders that stand 5'-1" to 5'-5" tall, the Reach Handlebar was ergonomically designed to provide the ideal combination of shoulder position, elbow bend and wrist angle. The bar brings the grips closer to the rider, and features a narrower width, lower height and flatter hand position. The narrow profile also brings the hands in toward the center of the vehicle for easier maneuvering.

Combining a Reach Seat with a Reach Handlebar provides a smaller stature rider with an optimized rider triangle and a complete fit solution.

Fits '09-later Electra Glide®, Street Glide®, Ultra Limited (except '10-'13 FLHTK) and '09-later Trike models (except Freewheeler®). Also fits '17-later FLHTKSE and FLHXSE models. HANDLEBAR RISERS

You may think you are perfectly happy with the way your bike is adjusted. But that doesn't mean that it is correctly set up for you. We get used to our bikes – our muscles become trained and we end up accommodating the bike. It is far better to take the time to make the bike accommodate you. If you are satisfied with your handlebar's width and wrist position, but wish it was just a little higher, lower or closer to you, your dealer can recommend a set of handlebar risers that move the bar into your comfort zone.

Just about every model of Harley-Davidson® motorcycle comes with a different stock handlebar. Selected to complement the style of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.

STOCK HANDLEBAR WITH RISERS

If the stock handlebar has the correct width and hand position for you, but seems just a little too far away, we offer riser kits that bring the controls within reach. Straight and curved risers are available for many model and handlebar combinations.

AUDIO & GAUGES

Measure your next journey in songs, not miles. With the Harley-Davidson® Boom!™ Audio sound system, you'll lose yourself in your own soundtrack. And with Bluetooth®-enabled wireless communication, you can stay connected, even in the middle of nowhere.

BOOM!™ AUDIO — THE CHOICE IS CLEAR

Harley-Davidson® Boom!™ Audio is an exciting collection of integrated audio components designed to combine the maximum number of features with an easy-to-use interface. And because your bike's Original Equipment radio is designed for plug-and-play integration of Boom! Audio equipment, you can easily create the custom sound experience you've always wanted.

Our goal is to deliver exceptional products that create a deep emotional connection between music and riding. We don't take the easy way out by assuming that louder is better. Instead, we find ways to optimize bass while keeping distortion low. Our audio specialists work hand in hand with our vehicle engineers to optimize speaker enclosures and locations for both the standard and Boom! Audio speakers.

Boom! Audio systems are designed to be loud enough to cut through road noise without sacrificing accurate sound reproduction. All you hear is musical balance and clarity. Each combination of speakers relies on a unique equalization curve programmed into the amplifier to maximize the system's performance. This gives Boom! Audio a clear advantage over other aftermarket systems.

INSIDE BOOM!™ AUDIO SPEAKERS

Designed for increased volume, deep bass, and high-output durability, Boom! Audio Speakers feature advanced rare earth magnets are made with neodymium compounded with iron and boron. Neo magnets are light, small and very powerful. They are roughly 10 times stronger than equivalent ferrite magnets, so neo magnets achieve the same strength with one-tenth the size and weight of traditional magnets.

1 TOUR-PAK® SPEAKERS

Surround yourself with sound Forward-facing speakers feature waterproof tweeters and injection-molded woofer cones with high-flux Neodymium magnets and are sized to be a direct replacement for the factory speakers.

2 BOOM!™ BOX 6.5GT RADIO

The Boom! Box 6.5GT Touchscreen Infotainment System is the ideal upgrade for models equipped with the standard Boom! Box 4.3 radio. The 6.5GT features AM/FM radio, weather alert, integrated iPod and USB audio device playback, map-based GPS navigation and Bluetooth pairing of mobile phones.

3 FAIRING SPEAKERS

Capture every note. Designed for maximum performance in the harsh motorcycle environment, when paired with an amplifier these waterproof speakers feature louder output, reduced distortion and improved clarity at speed.

4 AMPLIFIERS

When loud just isn't loud enough. Rugged Fairing, Tour-Pak® and Saddlebag-mounted amplifiers provide increased volume, lower distortion, reduced clipping and fuller sound that cuts through wind and road noise.

5 FAIRING LOWER SPEAKERS

Nestled into the glove boxes of your vented fairing lowers, these vibration-tested waterproof speakers feature rider directed tweeters for clear, crisp sound.

6 WIRED OR WIRELESS COMMUNICATION

You and your passenger can talk with other riders, even when you are miles apart. Bluetooth®-enabled wireless headsets or the integrated wired CB features easy to use handlebar controls and will mute the radio while in use.

7 SADDLEBAG LID SPEAKERS

Directionally optimized for improved rider acoustics, these waterproof 5" x 7" speakers turn the latched and gasket-sealed saddlebags into large speaker enclosures for enhanced bass response.

8 HIDDEN ANTENNA

Hide the antenna inside the fairing for a clean, uncluttered look. Perfect for your slick custom bagger, the Hidden Antenna is the ideal addition to models equipped with H-D® Detachables™ Tour-Pak® luggage.

SELECT YOUR SYSTEM – STAGE I OR STAGE II

Your bike's factory-equipped Boom![™] Box in-dash audio system and speakers are designed to provide enjoyable full-range sound quality, at a volume level you can hear on the open road. With the addition of Boom! Audio speakers and amplifiers you'll get louder, ride-enhancing sound — thanks to increased frequency response, lower distortion and strong mid-range performance that cut through wind noise. Designed specifically for your ride, Boom! Audio equipment doesn't just sound great — it's engineered tough to withstand the harsh outdoor environment.

STAGE II

FOR THE PUREST SOUND EXPERIENCE

6.5" ROUND SPEAKER (ROADGLIDE® FAIRING SPEAKER SHOWN)

5" x 7" SADDLEBAG SPEAKER

1 WOOFER 2 MID-FREQUENCY DRIVER 3 TWEETER

Boom! Audio Stage II systems achieve the highest quality and purest sound experience on the market with the deepest bass and clearest mids and highs.

Bi-amplified, three-way 150-watt per channel speakers feature:

- A woofer, a mid-range and a tweeter that deliver low, mid and high frequencies through the best driver design
- Two 75-watt amplifier channels that power each speaker – one powers the woofer and one powers the mid-range/tweeter combo

STAGE I

FOR QUALITY SOUND AND DEEP BASS

6.5" ROUND SPEAKER (BATWING® FAIRING SPEAKER SHOWN)

5" x 7" SADDLEBAG SPEAKER

1 WOOFER 2 TWEETER

Boom! Audio Stage I systems achieve clear highs and deep bass for great sound quality.

Single amplified, two-way 75-watt per channel speakers feature:

- A woofer and tweeter that deliver great sounding low and high frequencies
- One 75-watt amplifier channel that powers each speaker

DECIDE HOW FAR YOU WANT TO GO

Equipping your bike with a concert-quality sound-system is not as difficult as you would think. Follow these three simple steps to determine how you want your bike equipped, and then select which Boom! TM Audio speaker system matches your needs.

STEP 1

REPLACE THE FACTORY SPEAKERS

The first step toward audio perfection is to replace the Original Equipment speakers with your choice of Boom! Audio speakers and matching amplifier(s). The larger bass and separate mid/high range speaker components deliver increased musical accuracy, and the added power helps cut through the wind and road noise.

4-speaker Stage I systems require one Boom! Audio amplifier, and bi-amplified Stage II systems are powered by two dedicated amplifiers.

STEP 2

ADD SPEAKERS & AMPS

Now we are getting serious. Adding a 3rd pair of Boom! Audio speakers and an additional amplifier delivers the extra punch that only a "wall of sound" can provide. Adding a third set of speakers in the saddlebag lids or in the fairing lowers directs more sound to the motorcycle's cockpit, building depth and presence to the musical experience.

6-speaker Stage I systems are powered by two Boom! Audio amplifiers, and bi-amplified Stage II systems require three dedicated amplifiers.

STEP 3

BUILD THE ULTIMATE SYSTEM

This is the complete package. Rounding out the system with a fourth set of speakers adds enhanced bass punch and a weighty sound sure to grab attention. The 8-speaker "surround sound" effect puts the rider and passenger inside an envelope of sound for a road-tripping musical experience like no other.

8-speaker Stage I systems are powered by two Boom! Audio amplifiers, and bi-amplified Stage II systems require four dedicated amplifiers.

STAGE II BOOM!™ AUDIO SYSTEMS

Boom!™ Audio Stage II systems give you the very best motorcycle sound experience. Stage II systems are based on a bi-amplified, three-way speaker design. Each Stage II speaker features a separate woofer, mid-range and tweeter element that allow frequencies to be delivered with the optimum driver design. Each speaker is powered by two channels from the amplifier — one for the woofer, and the second for the mid-range/tweeter combination — for a total output of 150 watts/speaker. This doubling of the power allows you to play your music louder with far less distortion than traditional systems.

Boom!™ Audio – Stage II

BOOM!™ AUDIO STAGE II COMPONENTS*

Headline your own concert tour. Big and bold is the best way to describe the musical performance you will experience when listening to your favorite band through a Boom!™ Audio Stage II sound system. The weather-proof 3-way speakers feature high-excursion woofers for extended bass performance, and separate mid- and high-frequency drivers for rich vocals and startlingly real treble notes. Powered by a dedicated 300 watt RMS amplifier, each pair of speakers is capable of producing “filling-rattling” volume. Designed to work seamlessly with the factory installed Boom! Audio infotainment head unit, the Boom! Stage II components are system matched and feature custom tuned static and dynamic equalization that dial in the ideal setup for your ride. And you can choose how far you want to go. From a single pair of fairing mounted speakers and a 300 watt amp to a full bore 8 speaker, 4 amp, 1200 watt system, we’ve got you covered.

A. BOOM! AUDIO AMPLIFIER KIT

Take your music to the streets. Boom!™ Audio Amplifier Kits allow you to crank up the volume with significantly less distortion. The amplifier provides more power than Original Equipment radio alone, resulting in increased volume, fuller sound reproduction, reduced clipping and lower Total Harmonic Distortion (THD). Unlike aftermarket amplifiers that connect between the radio and the speakers, the Boom! Audio amplifier bypasses the radio’s internal power amp to produce the cleanest sound possible. The Boom! Audio Amplifier boosts the pure source signal, minimizing any distortion generated through the speaker output. The system-matched high-output signal features optimized sound equalization for crisp, clear vocals and maximum bass response and the strong midrange response cuts through wind and road noise. The waterproof 4-channel, 75-watts RMS/channel amplifier (300-watt RMS total) has been designed from the ground-up for the harsh motorcycle environment. Fairing Mounted kit includes all mounting hardware and wiring harness. Note: The use of the Boom! Audio Amplifier turns off the radio’s internal amplifier.

NO NEED TO SHOUT

Riding alone is a good way to unwind and clear your head. But if you've got a passenger, or you're riding with a group, inevitably you'll need to communicate with others. A tap on the helmet, a hand signal or frantic waves only get you so far. Welcome to Boom!™ Audio wireless Bluetooth® technology.

Boom! Audio Bluetooth headsets allow riders and passengers to connect on the open road. These comfortable headsets permit a number of riders to pair into the network and "rebroadcast" signals up and down the line to extend the effective range. In addition to driver-to-rider intercom and bike-to-bike communication, these wireless headsets let you connect to cell phones, GPS devices, and personal music players.

Headlamps – Auxiliary

A. DAYMAKER™ REFLECTOR LED FOG LAMPS

Compact 2.5" bullet-shaped reflector-optics fog lamps produce a bright white pool of light near the vehicle and fill in the dark area between the bike and the low-beam pattern. WHEELS

Make a definitive style statement. Whether you're going for an old-school or new-school look, this is where you set the tone. You'll ride comfortably knowing that Harley-Davidson® wheels meet the highest standards of performance and durability.

STRENGTH & STYLE

From a visual perspective, the wheels, sprocket and brake rotors make up almost half of the motorcycle's profile, and they set the styling direction for the whole bike. Choose wisely. Harley-Davidson® custom wheels undergo thousands of hours of real-world testing to meet the highest standards of performance and durability.

WHEEL FINISH OPTIONS

SELECT A FINISH TO MATCH YOUR STYLE

MIRROR CHROME

Looking for the ultimate flash? Choose Mirror Chrome wheels. To achieve this rich look, our dedicated team of polishers spends hours preparing the wheel for its finish. All visible wheel surfaces are micro-polished to a glass smooth finish, and special masking is applied to prevent contamination to threads and bearing bores.

CONTRAST CHROME

Can't make up your mind? Choose Contrast Chrome wheels. We start with a hand polished wheel, and add a proprietary finish that features both gloss black paint and chrome highlights. The combination produces a stunning contrast that lightens the wheel's profile by visually thinning the spokes, rim and hub.

GLOSS BLACK

Want a sinister look? Choose Gloss Black. First, we polish all the surfaces. Then we apply the rich coating for a finish with incredible depth and shimmer. The all-black spoke and rim blend with the tire sidewall to deliver a massive profile on a blacked-out bike, but the deep gloss surface holds its own in the company of chrome.

WHEEL CARE

The road provides plenty of nasty elements that can be potentially damaging to the finish of motorcycle wheels. Harley® Wheel & Tire Cleaner safely removes brake dust and road grime from wheels, tires and whitewalls in seconds. Just wet the wheel, spray on Wheel & Tire Cleaner, work it into tight areas with a Spoke Brush, and rinse away the dirt.

WHEEL ORDERING PROCESS

STEP ONE

Select a wheel part number for your specific fitment.

STEP TWO

Select the wheel installation kit for your specific application (model, year, and front or rear). Note: If your model is not specified in the wheel fitment, a wheel installation kit will not make the wheel fit your model.

STEP THREE

Refer to the instruction sheet included in your wheel kit to determine the necessary parts required from the installation kit.

STEP FOUR

Use only Harley-Davidson specified tires. See a Harley-Davidson® dealer. Using non-specified tires can adversely affect stability, handling or braking, which could result in death or serious injury.

KNOCKOUT CUSTOM WHEEL KIT

The perfect one-two styling punch for your custom Road Glide® model. Knockout 21" front and 18" rear wheels feature a split seven-spoke design that provides an open and airy look, with the spokes blending into the rim to add visual diameter. Kit includes 21" front wheel, 18" rear wheel, and the internal front suspension components necessary to optimize fork travel and ride quality. Available in gloss black with black anodizing or contrast chrome finishes, the Knockout wheel kit provides the big wheel look you crave, without compromising touring performance and reliability.

COLOR SHOP

The bike is a blank canvas, a surface ready to express your personality with design, color and texture. Harley-Davidson® Color Shop paint and color-matched components set the tone for the rest of the accessories and set your bike apart from the crowd.

COLOR SHOP LIMITED CUSTOM PAINT

The Motor Company commissions only a handful of custom designs each year. Each hand-painted set has been lovingly created by a small team of artists and specialists, exercising their vast skills to deliver depth and dimension unknown in production paint. And because Harley-Davidson hand-picks our custom painters, we can stand behind each Limited Series paint set with an unmatched 2-year Harley-Davidson® warranty when installed under the Custom Coverage Program.

COLOR SHOP LIMITED SERIES – VELOCITY

Velocity is defined as the rate of change of position with respect to time. So there's no time like now to change your position. To set the pace, this bullet is jacketed in piano black with a whisper of blue midnight sky pearl for added shimmer. Then we add nebula silver panels accented with charcoal fade speed lines and tip-to-tail H-D Orange race stripes to impart a sense of forward motion. And finally, we finish it off with a muscular silver outline Harley-Davidson signature. Set includes custom wrapped front fender. Limited availability – only 225 sets will be offered worldwide. B. COLOR-MATCHED ROAD GLIDE® HEADLAMP TRIM

This sleek one-piece headlamp surround adds a clean custom look to the nose of the Road Glide® model. The easy-to-install Headlamp Trim hugs the dual headlamps, and covers the matte black factory bezel for a menacing aerodynamic appearance. The swept back look and the knife-edge side strakes emphasize the streamlined shape of the fairing without impeding air flow to the vents or obstructing headlamp light patterns. Available in your choice of finish, the self-adhesive Headlamp Trim can be installed without removing the headlamp or fairing.

Fits '15-later Road Glide models.

B. CUSTOM STRETCHED SIDE COVERS

Add a long, lean look to the profile of your Touring bike. These Stretched Side Covers are sculpted to smooth the visual transition from the side of the bike to the front of the saddlebag, and trade the traditional stepped look for a rearward flowing design. Shaped to flare out and down the saddlebag face, the sleek side covers complement the body lines and eliminate the saddlebag guard clearance notch at the lower corner for a seamless flow. And unlike some aftermarket designs, these side covers fit without significantly compromising the available passenger foot space. The one-piece covers are a snap-in replacement for the Original Equipment covers, and require no bonding or modification for installation. Available in Color-Matched, Vivid Black or primed and ready-to-paint finish.

Fits '14-later Touring models. Does not fit with Auxiliary Power Port P/N 69201099.

Café Custom Accessories

A. COLOR-MATCHED CAFÉ CUSTOM TAIL SECTION

Create your own link to the Sportster®-based racing and performance bikes of the '60s and '70s. This fast-back solo seat and tail section mirrors the look and feel of the iconic 1977-78 Harley-Davidson® XLCR Café Racer model, and re-imagines the style for the modern era. Ideal for use with Clip-On or Sportster Clubman Handlebars and mid- or rear-set foot controls, this seat provides the perfect lay-down aggressive riding posture for splitting lanes or carving corners. The seat's upturned tail and longer nose positions the solo rider closer to the tank for better weight balance, quicker steering and added front-end feedback. The Tail Section is a true bolt-on design that wraps the fender struts, so unlike other café bike kits, there is no cutting, welding or frame modifications required. Installation is reversible – you can return easily your bike to the stock look. The complete kit features a sweeping composite tail section with a steel inner support, a deep solo bucket seat with backstop pad, and all necessary installation hardware.

Fits '10-later XL883N, XL1200CX, XL1200N, XL1200V and XL1200X models. Separate purchase of License Plate Bracket Kit P/N 67900360 for Canada models or P/N 67900359 for HDI models is required.

Complete bolt-on fender kit includes everything you need to convert your '04-later Sportster® model to the chopped rear fender look. Available in Vivid Black or Primed finish, this kit can be installed with simple tools and requires no frame modifications or fabrication. The chopped fender eliminates the traditional tail lamp and replaces the Original Equipment rear turn signals with stop-turn-tail lights for a clean, stripped-down appearance. D. REMOTE CONTROL GARAGE DOOR OPENER KIT

D. REMOTE CONTROL GARAGE DOOR OPENER KIT

Operate your automatic garage door opener without leaving your motorcycle seat or fumbling in your pocket for the remote control. Compatible with most brands of automatic openers, this kit allows you to operate your door by cycling the bike's high-beam switch. When your key is switched off the transmitter is disabled, providing added garage security if you park your bike outside. The signal is sent to the in-garage receiver that plugs into a standard 110-volt outlet and is wired to the automatic opener. The receiver's rolling code technology provides additional security. After riding your vehicle, park and switch the ignition off with your key. Within 5 seconds the Security System will automatically self-arm, disabling your vehicle starter, ignition and electronic fuel injection (EFI). MORE THAN AN OIL CHANGE

Maintaining your Harley® motorcycle can be almost as enjoyable as riding it. The hours spent in the driveway inspecting every part and every surface keeps you in touch with the bike. But when it comes to major service, remember that your Harley-Davidson® dealership's technicians are specially trained to properly diagnose and maintain your bike. Whether it's your first 1,000-mile checkup or a 20,000-mile service, a Harley-Davidson dealership should be your destination.

THE WELL-EQUIPPED GARAGE

Adventure comes at a price. As mileage adds up, moisture, dust and road debris can take their toll on the bike's wear-prone surfaces. But, if you have the right tools for fighting through miles and miles of the highway's abuse, you'll be more than ready to keep your bike in top running condition.

MAINTENANCE

Keeping your bike road-ready takes a special touch. Topping off the fluids, checking the tire pressure, and keeping the battery fully charged are no problem when you have the right Harley-Davidson maintenance tools in your garage.

TOOLS

Every bit as rugged as our motorcycles, Harley-Davidson tools and tool kits boast a compact, lightweight design developed specifically for use on your Harley® motorcycle.

FLUIDS

Whether it's oil, brake fluid or Screamin' Eagle® SYN3® Synthetic Motorcycle Lubricant, all Harley-Davidson fluids are developed exclusively for use in Harley-Davidson motorcycles, making them a must-have in your garage.

FILTERS

Don't overlook the essentials. Harley-Davidson air and oil filters keep debris out of your engine to help keep it healthy. So replace them routinely and insist on using only the Genuine article.

BATTERIES

Genuine H-D® Batteries are engineered for the harsh motorcycle environment, and feature AGM technology for higher cold cranking amps, longer life and improved rechargeability.

TIRES

Harley-Davidson co-branded Dunlop® and Michelin® tires are ready to go the distance. Extensively tested in real-world conditions, our recommended tires are engineered for long life, comfortable ride and competent handling.

OIL CHANGE ACCESSORIES

A. LOW PROFILE OIL DRAIN PAN

Tire Inflators

A. TIRE PRESSURE GAUGE AND FILL VALVE

Simplify checking the air pressure level and filling the tires on your motorcycle. This Tire Pressure Gauge features an 18" flexible hose and 2-way air chuck with both a 45° fill port and a unique side fill port that provides easy straight-in access to hard-to-reach motorcycle valve stems. The dual-range instant-read gauge measures pressures from 0-60 psi and 0-400 kPa, and is protected from impact and abrasion by a thick rubber collar. Designed to fit an air compressor with a standard 1/4" quick-disconnect coupler, this gauge allows you to check the pressure and fill the tire without removing the chuck from the tire. Just apply the chuck to the valve stem, read the pressure, and add air by depressing the comfortable trigger lever. And for checking tire pressure on the road, you can use this tool like any standard tire gauge.

B. COMPACT AIR COMPRESSOR WITH LIGHT

Correct tire pressure is crucial to safe operation and long tire life, but checking the pressure, finding a gas station with a working air pump, and filling the tire is a chore that many of us ignore. The Compact Air Compressor is designed to simplify this necessary procedure. The compact, lightweight 12V pump is designed for life on the road. The all-in-one pump plugs into your bike's battery charging harness, and features a built-in 0-160 psi pressure gauge and bright LED work light. The 11" air hose and 6' fuse-protected power cord easily reach the front and rear wheels, and are stored in convenient compartments when not in use. The lightweight pump features durable, impact-resistant construction, and is small enough to fit easily in a saddlebag or strap-on luggage. Kit includes pump, valve stem extension, and nylon carrying bag.

C. VALVE STEM EXTENSION

Sometimes there's just not enough space around the tire's valve stem for the gas station air chuck and hose to reach. Brake rotors, sprockets and saddlebags get in the way and keep the air chuck from making an airtight seal. When that happens, this Valve Stem Extension provides easy access. Simply screw the extension in place on the stem, fill the tire to the proper pressure, remove the extension, and replace the valve stem cap. Then toss the extension in your saddlebag or tool roll for the next time.

BODYGUARD IN A BOTTLE

Oil is the lifeblood of your engine. It not only lubricates the moving parts, it cools, cleans, and flushes away all the byproducts of combustion. It lives in an environment filled with heat, friction, and toxins that are determined to break it down and shorten its useful life. And it keeps the heart of your motorcycle beating at idle or at full speed. Harley-Davidson's complete line of lubricants are formulated specifically to keep your motorcycle running strong, mile after mile.

ENGINE OIL FAQ'S

What's in a bottle of oil?

- The Base Stock makes up 75-80% of a bottle of oil. Generally, if it comes from the ground, it is a Mineral Oil. And if it is made in a lab or a reactor, it is Synthetic Oil.
- The Additive Pack of ingredients that make oil smarter and better tailored to the application. The additives include:
 - Viscosity Modifiers – lets oil flow like 20 weight oil at start-up and 50 weight oil at operating temperatures
 - Detergents – cleans inside your engine
 - Dispersants – suspends contaminants in the oil so they can be carried to the filter
 - Buffers – neutralizes acids that form in your engine
 - Anti-oxidants – prevents sludge and oil thickening oxidation
 - Corrosion inhibitors – protects internal components from corroding
 - Anti-wear additives – provides protection against internal wear

How often should I change my motorcycle engine oil?

You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants during this time period.

What viscosity grade should I use in my Harley Motorcycle?

The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson® Motor Oil. The SAE 50 H-D® Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.

What's the difference between synthetic and petroleum-based lubricants?

Group I, II and III petroleum-based lubricants are derived from oil pumped from the ground. Group IV and V synthetic lubricants are chemically produced in a lab. Petroleum-based lubricants inherit physical components (including contaminants) of the source crude oil in the refining process, while synthetic lubricants are custom-formulated to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish – at the molecular level.

What's better in my bike – Petroleum or Synthetic?

Petroleum lubricants have been around for a long time, and are effective at lubricating in most conditions, but mineral oil can't compete with the purity of synthetic lubricants—especially in extreme conditions. Synthetic oil does a better job reducing wear and resisting breakdown under a wider range of operating temperatures.

What does SYN3® full Synthetic Motorcycle Lubricant do for my drivetrain?

SYN3® Full Synthetic Motorcycle Lubricant offers all the benefits of Genuine Harley-Davidson® 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmissions and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

What makes Harley SYN3 better than other Synthetics for my Harley?

- SYN3 is pure, genuine, full synthetic lubricant.
- SYN3 base stocks are synthesized materials – including Poly Alfa Olefin (PAO) and Esther, which are the most pure, highest quality synthetic base stocks available
- SYN3 has the smartest, most robust additive package developed specifically to provide maximum performance and protection in H-D powertrains

Beware...not all synthetics are created equal.

- Due to a legal loophole, other brands are selling "Highly Refined Group III" mineral oil as synthetic oil
- Head to head, SYN3 outperforms these oils

SYN3 is a product you can trust, from a brand you can trust. Oil is the lifeblood to your Harley-Davidson; don't take chances with anything else.

Why should I use H-D oil in my Harley?

- No one tests as much as we do – we test on the road, on dynos, and in the laboratory
- We accumulate millions of testing miles on our engines and drive trains, using only H-D Oil
- We test in the harshest environments – testing is performed in the extreme heat of the desert
- We test under the most rigorous duty cycles – accelerated durability testing helps explore the limits of our designs, in less time. This is a worst case scenario for oil
- We run thousands of hours on dynos
- We test in the laboratory – sampling and analyzing oil to determine its life and effectiveness during use

H-D's additive package is the best available, it's the most robust, it was created exclusively for H-D powertrains, and we are the only ones who have it.

A special thread and shell coating ensures quick and easy removal from aluminum heads and resists corrosion. A gold palladium insert extends life and improves resistance to corrosion. The tapered tip provides better spark exposure to air/fuel mixture and allows the mixture to flow more easily through gap area for maximum combustibility. Fouling resistance is improved with smaller diameter center electrode wire and insulator tip. Plus, a copper-cored ground electrode runs cooler for extended life.

ONE-YEAR OVER-THE-COUNTER PARTS AND ACCESSORIES WARRANTY

Harley-Davidson warrants that street legal Genuine Motor Parts ("Parts") and street legal Genuine Motor Accessories ("Accessories") that are purchased on or after January 1, 2012 through an authorized dealer will be free from factory defects, under normal use and service, for a period of one year starting from the date of retail sale and delivery (not date of installation). Because this limited warranty covers only Parts and Accessories, labor is not covered. This limited parts warranty does not cover defects or damage due to abuse, misuse or improper installation. This parts warranty applies to Parts and Accessories you or an aftermarket shop have installed, but only for defects in manufacturing — not conditions caused by the improper installation.

This Parts and Accessories warranty is separate and distinct from the limited factory warranty that applies to your stock motorcycle. This Parts and Accessories warranty does not extend or modify the factory warranty that applies to your motorcycle. It only covers the street legal Genuine Motor Parts and street legal Genuine Motor Accessories added to your motorcycle.

This Parts and Accessories warranty does not cover defects, damage or premature wear to your motorcycle that are caused by the installation or use of Parts and Accessories, even those installed by an authorized dealership. Examples include, but are not limited to performance-enhancing powertrain components or software, exhaust systems, non-approved tires, lowering kits, handlebars, add-ons connected to the factory electrical system, etc.

The fact that Parts or Accessories are labeled or branded Harley-Davidson, or are sold or installed by an authorized dealership, does not necessarily make them appropriate or warranted for the make and model of your motorcycle. The use of Parts and Accessories not designed and tested for your motorcycle may have negative consequences on the performance of your motorcycle and may create conditions not covered by the limited factory warranty.

The remedy for breach of this limited Parts and Accessories warranty is expressly limited to the repair or replacement of any component that proves to be defective, and does not extend or create liability for consequential damages, costs or expenses, including loss of time, inconvenience, or loss of use of the motorcycle. Any implied warranty, including warranty of merchantability or fitness for a particular purpose, is expressly limited to the duration of this limited one-year Parts and Accessories warranty, or to the shortest duration permitted by the laws in your state.

EXCLUDED COMPONENTS:

All Genuine Motor Parts & Accessories will qualify for the one-year over-the-counter warranty, with the following exceptions:

- Tires
